

CONFINED SPACE PRE-EVALUATION

Participant name:	Participant signature:	Date:
-------------------	------------------------	-------

Students who enrol into the Confined Space Entrant/Standby course with CEG-Training Partnerships must complete this pre-evaluation. The results from this test are confidential and helps CEG determine if assistance is required.

INSTRUCTIONS

- To be completed prior to course
- Complete in conjunction with the Learner Guide

1. What is a confined space?

(Choose the most correct answer)

- When an opening is made to a confined space and a person is exposed to the atmosphere of that space
- An enclosed or partially enclosed space not designed primarily to be occupied by a person
- When any part of a person's body is placed inside the boundary of a confined space
- An enclosed or partially enclosed space that is never occupied by a person

Please provide 4 examples of a confined space

1	
2	
3	
4	

2. **A confined space entry permit is:**

(Choose the most correct answer)

- A legislative document that allows a workplace to have and maintain confined spaces at the site
- Issued to trainees and learners in preparation for obtaining a full confined space licence
- A written authority for entry into a confined space and conduct work associated with the confined space
- A special licence authorising the person to enter any confined space at the work site

3. **What is the purpose of an emergency response plan when work in a confined space is necessary?**

(Choose the most correct answer)

- Ensures all emergency services are available on site during the completion of work in a confined space
- Outlines the order in which any required emergency services will respond if they are required
- Contains the roles and responsibilities of all workers involved in the confined spaces work
- A document issued to the site emergency services directing them to the work area by the shortest route

4. **Who is responsible for holding and putting the emergency response plan into action if it becomes necessary?**

(Choose the most correct answer)

- The stand-by person
- The work team leader
- The PCBU
- Every work team member

5. **What equipment is commonly used to prevent unauthorised entry into a work area?**

1	
2	

6. **Where should rescue & incident response equipment be placed before anyone attempts to enter the confined space?**

--

7. **When should a gas test monitor be calibrated?**

1	
2	

8. **What can be achieved by effective ventilation?**

(Choose all the correct answers)

- Replace contaminated air with fresher air
- Raise the oxygen levels above 23%
- Reduce / eliminate the toxicity of the area to below the TWA or STEL
- Minimise environmental hazards such as heat stress

9. **Is initial testing done from outside the confined space by inserting a sample probe at appropriately selected access holes, nozzles and openings?**

- YES
- NO
