Welcome to the RDA Eyre Peninsula Region Community Profile

The RDA Eyre Peninsula Region Estimated Resident Population for 2022 is 58,966, with a population density of 0.25 persons per square km.

The RDA Eyre Peninsula Region Community Profile provides demographic analysis for the Region and smaller areas within it based on results from the 2021, 2016, 2011, 2006 and 2001 Censuses of Population and Housing. The profile is updated with population estimates when the Australian Bureau of Statistics (ABS) releases new figures.

District Council of Cleve

Population and dwellings

The Census usual resident population of the District Council of Cleve in 2021 was 1,742, living in 976 dwellings with an average household size of 2.23.

There are a number of different ways of measuring the population of an area, all of which give an insight into the size of the place and its rate of growth over different time periods. The Census counts people where they are on the night of the Census (Enumerated population) and also by where they usually live (Usual residence). Both these populations are useful and form the basis for a range of characteristics collected in the Census.

However, the most accurate count of the total population is Estimated Resident Population, which factors in an estimate of those missed in the Census and those who were overseas on Census night. It is usually higher than either Census count, and is also updated annually after the Census, providing preliminary estimates for up to 5 years.

This page provides the three population counts for the District Council of Cleve at the last Census, with comparisons to previous Census years for the Census counts only. The current estimate for the District Council of Cleve at the most recent year available is shown at the top of the page. This figure is a preliminary estimate only and is subject to review after the next Census data are released. Please use with caution.

Also included are a range of sub-population groups and key statistics from the Census (Usual resident) population, such as citizens, employed persons and Indigenous population.

These figures all provide the context for the size of the population and growth rate within the District Council of Cleve and should be looked at in conjunction with other basic demographic information, such as Age Structure, Dwelling Type and Household Size.

The data on this page are sourced from a variety of different tables and designed to give a range of population and dwelling numbers for the area.

District Council of Cleve

Estimated Resident Population (ERP)

The population estimate for the District Council of Cleve as of the 30th June 2022 is 1,765. Since the previous year, the population has declined by 0.56%. Population growth in Regional SA was 0.56%.

The Estimated Resident Population (ERP) is the Australian Bureau of Statistics' official 2022 population figure for all Local Government Areas (LGAs) - but is subject to review after the next Census release. For areas smaller than LGAs, the ERP is derived from SA1 geographies based on population distribution from the previous Census. As such, these smaller geographies are subject to a greater level of revision each Census due to the change in actual numbers and in population distributions.

Populations are counted and estimated in various ways. The most comprehensive population count available in Australia is derived from the Census of Population and Housing conducted by the Australian Bureau of Statistics every five years. However the Census count is generally an under-estimate of the actual population, due to people missed in the Census and people overseas on Census night. To provide a more accurate population figure more frequently, the ABS also produces ERP numbers.

See [data notes](#) for a detailed explanation of different population types, how they are calculated and when to use each one.

Estimated Resident Population (ERP)

Year (ending June 30)	Number	Change in number	Change in percent	Regional SA change in percent
2006	2,000	--	--	--
2007	1,970	-30	-1.50	+0.86

District Council of Cleve

Service age groups

In 2021, the District Council of Cleve had higher proportion of children (under 18) and a similar proportion of persons aged 60 or older than Regional SA.

The Age Structure of the District Council of Cleve provides key insights into the level of demand for age based services and facilities such as child care. It is an indicator of the District Council of Cleve's residential role and function and how it is likely to change in the future.

Service age groups divide the population into age categories that reflect typical life-stages. They indicate the level of demand for services that target people at different stages in life and how that demand is changing.

To get a more complete picture the District Council of Cleve's Age Structure should be viewed in conjunction with Household Types and Dwelling Types.

Age structure - Service age groups

District Council of Cleve - Total persons (Usual residence)	2021			2016			Change

Change in age structure - service age groups, 2016 to 2021

District Council of Cleve - Total persons

Source: Australian Bureau of Statistics, Census of Population and Housing, 2016 and 2021 (Usual residence data). Compiled and presented in profile.id by .id (informed decisions).

Dominant groups

Analysis of the service age groups of the District Council of Cleve in 2021 compared to Regional SA shows that there was a higher proportion of people in the younger age groups (0 to 17 years) and a similar proportion of people in the older age groups (60+ years).

Overall, 22.9% of the population was aged between 0 and 17, and 32.4% were aged 60 years and over, compared with 20.0% and 32.6% respectively for Regional SA.

The major differences between the age structure of the District Council of Cleve and Regional SA were:

- A *larger* percentage of 'Primary schoolers' (9.6% compared to 8.1%)
- A *larger* percentage of 'Babies and pre-schoolers' (6.1% compared to 4.9%)
- A *smaller* percentage of 'Tertiary education & independence' (4.4% compared to 6.5%)
- A *smaller* percentage of 'Seniors' (13.0% compared to 14.7%)

Emerging groups

From 2016 to 2021, District Council of Cleve's population decreased by 37 people (2.1%). This represents an average annual population change of -0.42% per year over the period.

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Five year age groups

In 2021, the largest age group in the District Council of Cleve was 60 to 64 year olds. The group that changed the most since 2016 was 40 to 44 year olds, decreasing by 30 people.

The Age Structure of the District Council of Cleve provides key insights into the level of demand for age based services and facilities such as child care. It is also an indicator of the District Council of Cleve's residential role and function and how it is likely to change in the future.

Five year age groups present a classic age profile of the population. Each age group covers exactly five years, which enables direct comparison between each group.

To get a more complete picture the District Council of Cleve's Age Structure should be viewed in conjunction with Household Types and Dwelling Types.

Emerging groups

From 2016 to 2021, District Council of Cleve's population decreased by 24 people (1.4%). This represents an average annual population change of -0.27% per year over the period.

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Age-sex pyramid

Age-sex pyramid, 2021

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), selected years between 1991-2021 (Enumerated data). Compiled and presented in profile.id by [.id](#) (informed decisions).

The age-sex pyramid is a demographic tool which shows patterns of change in the age structure and sex ratio of an area over time. Its name comes from the traditional pyramid shape of an area which indicates a lot of children in large families, with a lower life expectancy and relatively few elderly. This shape is quite rare in developed nations like Australia. As nations and areas transition over time this shape turns into a column where there are less children a mix of ages including many elderly. Older areas with a lot of retirees or relatively few births may have a "reverse" pyramid formation where the largest proportion of the population is at the top of the chart. The sex ratio of males to females can also be seen - young areas are likely to have more males, while elderly areas generally have more females due to longer life expectancy.

The age-sex pyramid should be used in conjunction with [Household Types](#) and [Dwelling Types](#) information to build up a picture of who is living in the area and how it is changing over time.

Further reading: [Using demographics to inform gender equality](#)

District Council of Cleve

Ancestry

The three largest ancestries in the District Council of Cleve in 2021 were Australian, English and German.

Ancestry defines the cultural association and ethnic background of an individual going back three generations. Ancestry is a good measure of the total size of cultural groups in the District Council of Cleve regardless of where they were born or what language they speak.

Ancestry data, should be combined with data on **Birthplace**, **Language Spoken at Home** and **Religion** for a more complete picture of the District Council of Cleve's ethnic characteristics.

Please note that the "Australian Aboriginal" and "Torres Strait Islander" categories in this topic are not directly comparable from 2021 to previous years, due to a change in the wording of the question. In 2021, these options were marked boxes on the question rather than write-in options. The "Aboriginal and Torres Strait Islander Origin" question is still considered a more reliable count for this group, and can be found on the **Population summary** page.

Please note: Due to changes in ABS rules around perturbation and additivity of data to protect the confidentiality of individuals, counts of ancestry groups and totals derived from them may differ slightly from those published by the ABS. For more information see notes on data confidentiality.

Dominant groups

Analysis of the ancestry responses of the population in District Council of Cleve in 2021 shows that the top five ancestries nominated were:

- Australian (835 people or 48.2%)
- English (697 people or 40.2%)
- German (197 people or 11.4%)
- Scottish (140 people or 8.1%)
- Irish (97 people or 5.6%)

In combination these five ancestries account for 1,966 responses in total, or 113.38% of all responses.

The major differences between the ancestries of the population in the District Council of Cleve and Regional SA were:

- A *larger* percentage of people with Australian ancestry (48.2% compared to 40.5%)
- A *smaller* percentage of people with Australian Aboriginal ancestry (0.8% compared to 4.3%)
- A *smaller* percentage of people with Irish ancestry (5.6% compared to 7.7%)
- A *smaller* percentage of people with English ancestry (40.2% compared to 42.0%)

Emerging groups

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Birthplace

In 2021, 5.1% of people in the District Council of Cleve were born overseas, compared with 11.6% in Regional SA.

Country of Birth data identifies where people were born and is indicative of the level of cultural diversity in the District Council of Cleve. The mix of Country of Birth groups is also indicative of historical settlement patterns, as source countries for Australia's immigration program have varied significantly over time.

To get a more complete picture of cultural and ethnic characteristics, the District Council of Cleve's Country of Birth data should be viewed together with Ancestry, Language Spoken at Home and Religion.

Please note: Due to changes in ABS rules around perturbation and additivity of data to protect the confidentiality of individuals, counts of individual birthplace groups and totals derived from them may differ slightly from those published by the ABS. For more information see notes on data confidentiality.

District Council of Cleve

Source: Australian Bureau of Statistics, Census of Population and Housing, 2016 and 2021 (Usual residence data). Compiled and presented in profile.id by .id (informed decisions).

Dominant groups

Analysis of the country of birth of the population in the District Council of Cleve in 2021 compared to Regional SA shows that there was a smaller proportion of people born overseas.

Overall, 5.1% of the population was born overseas, compared with 11.6% for Regional SA.

The major difference between the countries of birth of the population in the District Council of Cleve and Regional SA was:

- A *smaller* percentage of people born in United Kingdom (2.1% compared to 5.0%)

Emerging groups

Between 2016 and 2021, the number of people born overseas increased by 11 or 14.3%.

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Overseas arrivals

88 people who were living in the District Council of Cleve in 2021 were born overseas, and 14% arrived in Australia within 5 years prior to 2021.

The Year of Arrival data records when the overseas born population arrived in Australia. The data shows the degree to which areas are 'ports' for new overseas arrivals and reveals the role of the District Council of Cleve in housing the overseas-born. The number of recent overseas arrivals in an area is often determined by housing affordability, employment opportunities and pre-existing communities located in the area.

the District Council of Cleve's Year of Arrival data, when used with Birthplace, Religion and Language Spoken at Home data, is a good indicator of the likely need for services in migrant communities.

Overseas arrivals

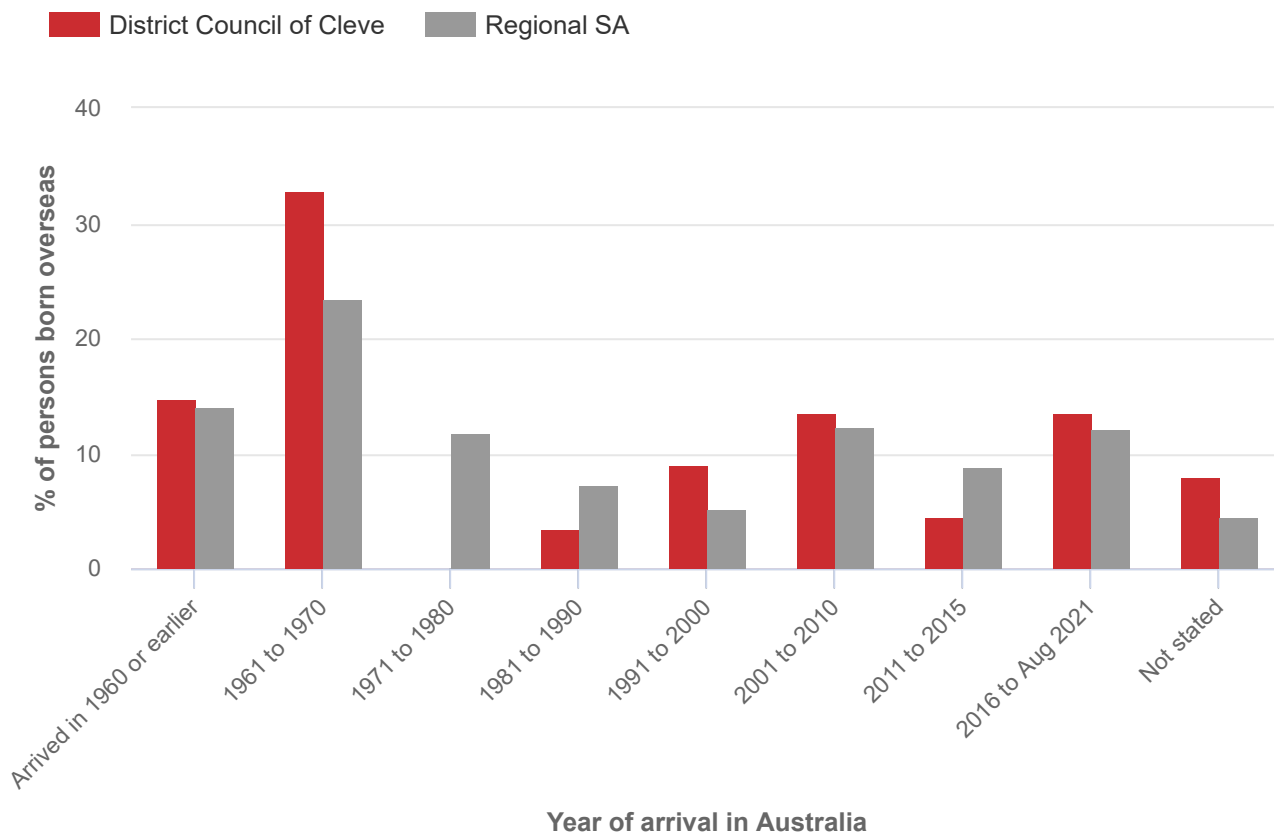

District Council of Cleve - Overseas born (Usual residence)	2021		
Year of arrival in Australia	Number	%	Regional SA %

Overseas arrivals, 2021

Total persons

Source: Australian Bureau of Statistics, Census of Population and Housing, 2021 (Usual residence data). Compiled and presented in profile.id by .id (informed decisions).

Dominant groups

Analysis of the year of arrival for the overseas born population of the District Council of Cleve in 2021 compared to Regional SA shows that there was a smaller proportion of people who arrived before 2001, and a larger proportion of recent overseas arrivals (those who arrived between 2016 to Aug 2021).

Overall, 60.2% of the overseas born population arrived before 2001, and 14% arrived during or after 2016, compared with 62.0% and 12.2% respectively for Regional SA.

The major differences in year of arrival data in the population between the District Council of Cleve and Regional SA are:

- A *larger* percentage of arrivals between 1961 to 1970 (33.0% compared to 23.6%)
- A *smaller* percentage of arrivals between 1971 to 1980 (0.0% compared to 11.9%)
- A *smaller* percentage of arrivals between 2011 to 2015 (4.5% compared to 8.9%)
- A *smaller* percentage of arrivals between 1981 to 1990 (3.4% compared to 7.4%)

District Council of Cleve

Proficiency in English

In the District Council of Cleve in 2021, No people who spoke a language other than English at home reported difficulty speaking English.

Proficiency in English measures the self-assessed proficiency in spoken English of people who speak a language other than English at home. The data, when viewed with other ethnic and cultural indicators, such as **Ancestry**, **Country of Birth**, **Language Spoken at Home** and **Religion**, reflects the District Council of Cleve's ethnic composition and how long the overseas born have been in Australia. This helps service providers determine whether they need to communicate with the local population in languages other than English.

Proficiency in English

District Council of Cleve - Total persons (Usual residence)	2021			2016			Change
English proficiency	Number	%	Regional SA %	Number	%	Regional SA %	2016 to 2021

Dominant groups

Analysis of the proficiency in English data of the population in the District Council of Cleve in 2021 compared to Regional SA shows that there was a higher proportion of people who spoke English only, and a lower proportion of people who spoke another language and English not well or not at all.

Overall, 90.7% of people spoke English only, and 0.0% spoke another language and English not well or not at all, compared with 87.7% and 0.7% respectively for Regional SA.

Emerging groups

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Language used at home

The District Council of Cleve's language statistics show the proportion of the population who use a language at home other than English. They indicate how culturally diverse a population is and the degree to which different ethnic groups and nationalities are retaining their language.

The District Council of Cleve's language statistics should be analysed in conjunction with **Country of Birth** and **Proficiency in English** to assist in identifying specific cultural and ethnic groups in the area and the services required by the multicultural community.

Please note: Due to ABS rules regarding perturbation of data to protect the confidentiality of individuals, counts of individual language groups and totals derived from them may differ slightly from those published by the ABS.

District Council of Cleve

Religion

In the District Council of Cleve in 2021, the largest religious group was Uniting Church (16.0% of all people), while 41.1% of people had no religion and 9.5% did not answer the question on religion.

The District Council of Cleve's religion statistics provide an indicator of cultural identity and ethnicity when observed in conjunction with other key variables. Religion data reveal the major concentrations of religions as well as revealing the proportion of people with no religious affiliation. There are a number of reasons for different religious compositions across areas including the country of birth and ethnic background of the population, the age of the population (belief in religion is generally stronger, the older the population) and changes in values and belief systems.

The District Council of Cleve's religion statistics should be analysed in conjunction with other ethnicity statistics such as Country of Birth data and Language Spoken data to assist in identifying specific cultural and ethnic groups.

Please note: Due to changes in ABS rules around perturbation and additivity of data to protect the confidentiality of individuals, counts of individual religion groups and totals derived from them may differ slightly from those published by the ABS.

District Council of Cleve

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Usual residence data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

Analysis of the religious affiliation of the population of the District Council of Cleve in 2021 compared to Regional SA shows that there was a higher proportion of people who professed a religion and a lower proportion who stated they had no religion.

Overall, 49.2% of the population nominated a religion, and 41.1% said they had no religion, compared with 42.9% and 47.8% respectively for Regional SA.

The largest single religion in the District Council of Cleve was Uniting Church, with 16.0% of the population or 279 people as adherents.

The major differences between the religious affiliation for the population of the District Council of Cleve and Regional SA were:

- A *larger* percentage who nominated Uniting Church (16.0% compared to 7.7%)
- A *larger* percentage who nominated Christian,nfd (4.4% compared to 2.5%)
- A *larger* percentage who nominated Lutheran (6.3% compared to 5.3%)

Emerging groups

The largest changes in the religious affiliation of the population in the District Council of Cleve between 2016 and 2021 were for those who nominated:

- Uniting Church (-181 persons)
- Anglican (-62 persons)

District Council of Cleve Qualifications

22.9% of people in District Council of Cleve had a Vocational qualification in 2021, lower than Regional SA. This represents an increase of 13 people since 2016.

Educational Qualifications relate to education outside of primary and secondary school and are one of the most important indicators of socio-economic status. With other data sources, such as [Employment Status](#), [Income](#) and [Occupation](#), District Council of Cleve's Educational Qualifications help to evaluate the economic opportunities and socio-economic status of the area and identify skill gaps in the labour market.

Dominant groups

Analysis of the highest level of schooling attained by the population in the District Council of Cleve in 2021 compared to Regional SA shows that there was a lower proportion of people who had left school at an early level (Year 10 or less) and a higher proportion of people who completed Year 12 or equivalent.

Overall, 29.1% of the population left school at Year 10 or below, and 39.8% went on to complete Year 12 or equivalent, compared with 33.2% and 37.6% respectively for Regional SA.

The major differences between the level of schooling attained by the population in the District Council of Cleve and Regional SA were:

- A *larger* percentage of persons who completed year 12 or equivalent (39.8% compared to 37.6%)
- A *smaller* percentage of persons who completed year 10 or equivalent (16.9% compared to 20.0%)
- A *smaller* percentage of persons who completed year 9 or equivalent (5.8% compared to 6.9%)

Emerging groups

The largest change in the level of schooling attained by the population in the District Council of Cleve, between 2016 and 2021 was:

- Year 12 or equivalent (+60 persons)

District Council of Cleve

Education institution attending

In 2021, 13 people in the District Council of Cleve were attending university. This represents 0.7% of the population, compared to 1.5% in Regional SA.

The share of the District Council of Cleve's population attending educational institutions reflects the age structure of the population, as it is influenced by the number of children attending school; proximity to tertiary education, which can mean young adults leaving home to be nearer to educational facilities and; the degree to which people are seeking out educational opportunities in adulthood, especially in their late teens and early twenties.

This data is often combined with Age Structure to identify areas with significant university student populations.

Learn more about planning education provision here.

Dominant groups

Analysis of the share of the population attending educational institutions in the District Council of Cleve in 2021 compared to Regional SA shows that there was a higher proportion attending primary school, a similar proportion attending secondary school, and a lower proportion engaged in tertiary level education.

Overall, 9.9% of the population were attending primary school, 5.2% of the population were attending secondary institutions, and 1.8% were learning at a tertiary level, compared with 8.2%, 5.4% and 3.1% respectively for Regional SA.

The major differences between the share of the population attending learning institutions in the District Council of Cleve and Regional SA were:

- A *larger* percentage of persons attending a Government primary school (9.6% compared to 5.9%)
- A *larger* percentage of persons attending a primary school (any type) (9.9% compared to 8.2%)
- A *larger* percentage of persons attending a Government secondary school (4.9% compared to 3.9%)
- A *smaller* percentage of persons attending a Catholic primary school (0.0% compared to 1.1%)

Emerging groups

From 2016 to 2021, District Council of Cleve's population decreased by 30 people (+1.7%). This represents an average annual change of -0.34% per year over the period.

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Need for assistance

In 2021, 88 people (or 5.0% of the population) in the District Council of Cleve reported needing help in their day-to-day lives due to disability. This was a similar percentage to 2016.

the District Council of Cleve's disability statistics relate directly to need for assistance due to a severe or profound disability. The information may be used in the planning of local facilities, services such as day-care and occasional care and in the provision of information and support to carers. the District Council of Cleve's disability statistics help in understanding the prevalence of people who need support in the community, and along with information on Unpaid Care to a person with a disability, how that support is provided.

Please note: A person's reported need for assistance is based on a subjective assessment and should therefore be treated with caution. See the specific data notes for further detail.

Dominant groups

Analysis of the need for assistance of people in District Council of Cleve compared to Regional SA shows that there was a lower proportion of people who reported needing assistance with core activities.

Overall, 5.0% of the population reported needing assistance with core activities, compared with 7.0% for Regional SA.

The major differences in the age groups reporting a need for assistance in the District Council of Cleve and Regional SA were:

- A *smaller* percentage of persons aged 80 to 84 (9.6% compared to 22.8%)
- A *smaller* percentage of persons aged 75 to 79 (4.6% compared to 14.1%)
- A *smaller* percentage of persons aged 65 to 69 (2.5% compared to 7.5%)
- A *smaller* percentage of persons aged 10 to 19 (0.0% compared to 4.9%)

Emerging groups

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Long term health conditions

In the District Council of Cleve, the most common long-term health condition was asthma, while 30.1% of the population reported one or more health conditions, a lower rate than in Regional SA (37.5%).

The 2021 Census looked for the first time at the level of incidence of selected long-term health conditions in the community. The Census question asked respondents if they have been diagnosed with a specific condition (or other condition) from a list of ten conditions plus "other". Combined, these ten conditions comprise approximately 60% of Australia's deaths, and even those which are not deadly contribute substantially to the burden of disease.

It is well known that socio-economic factors also contribute to morbidity and health outcomes, with lower-socio economic characteristics correlated with higher incidence of some health conditions. The inclusion of this topic in the Census enables these factors to be explored in more detail.

Also, in society, health conditions tend to increase with age. For these reasons, it is recommended that long-term health conditions data for be viewed at in conjunction with age structure, household income, educational qualifications, and need for assistance datasets, along with the SEIFA index of disadvantage.

Long term health conditions

District Council of Cleve - Persons (Usual residence)	2021

Long term health conditions, all persons, 2021

Source: Australian Bureau of Statistics, Census of Population and Housing, 2021 (Usual residence data). Compiled and presented in profile.id by .id (informed decisions).

Dominant groups

Analysis of the long term health conditions of the District Council of Cleve in 2021 compared to Regional SA shows that there was a lower proportion of people with a long-term health condition 30.1% compared to 37.5% in Regional SA.

The major differences in the long-term health conditions between the District Council of Cleve and Regional SA are:

- A *smaller* percentage with mental health condition (6.4% compared to 9.9%)
- A *smaller* percentage with arthritis (9.0% compared to 12.2%)
- A *smaller* percentage with other long-term health condition (5.5% compared to 8.3%)
- A *smaller* percentage with heart disease (4.1% compared to 5.5%)

District Council of Cleve

Employment status

830 people living in the District Council of Cleve in 2021 were employed, of which 57% worked full-time and 34% part-time.

the District Council of Cleve's employment statistics are an important indicator of socio-economic status. The levels of full or part-time employment, unemployment and labour force participation indicate the strength of the local economy and social characteristics of the population. Employment status is linked to a number of factors including **Age Structure**, which influences the number of people in the workforce; the economic base and employment opportunities available in the area and; the education and skill base of the population (**Occupations, Industries, Qualifications**).

The two most important measures are:

- Unemployment rate - the number of people looking for work, as a percentage of the labour force (employed and unemployed over 15)
- Participation rate - the labour force expressed as a percentage of the total population over 15

Please note that in the 2021 Census, due to the COVID pandemic and lockdowns in many areas, the proportion of people who were employed but away from work in the week before Census has increased. We have no information on whether these people were normally employed full or part time so this is shown separately.

Labour force status

Change in employment status, 2016 to 2021

District Council of Cleve - Total persons in the labour force

Source: Australian Bureau of Statistics, Census of Population and Housing, 2016 and 2021 (Usual residence data). Compiled and presented in profile.id by .id (informed decisions).

Dominant groups

The size of the District Council of Cleve's labour force in 2021 was 847, of which 283 were employed part-time and 476 were full time workers.

Analysis of the employment status (as a percentage of the labour force) in the District Council of Cleve in 2021 compared to Regional SA shows that there was a higher proportion in employment, and a lower proportion unemployed. Overall, 98.0% of the labour force was employed, and 2.0% unemployed, compared with 95.2% and 4.8% respectively for Regional SA.

Analysis of the labour force participation rate of the population in the District Council of Cleve in 2021 shows that there was a higher proportion in the labour force (60.6%) compared with Regional SA (54.1%).

Emerging groups

Between 2016 and 2021, the number of people employed in the District Council of Cleve showed a decrease of 17, and the number unemployed showed a decrease of 5. In the same period, the number of people in the labour force showed a decrease of 22 or 2.5%.

District Council of Cleve

Industry sector of employment

More District Council of Cleve residents worked in agriculture, forestry and fishing than any other industry in 2021.

The District Council of Cleve's industry statistics identify the industry sectors in which the residents work (which may be within the residing area or elsewhere). This will be influenced by the skill base and socio-economic status of the residents as well as the industries and employment opportunities present in the region.

When viewed in conjunction with Residents Place of Work data and Method of Travel to Work, industry sector statistics provide insights into the relationship between the economic and residential role of the area.

Change in industry sector of employment, 2016 to 2021

District Council of Cleve - Total employed persons

Source: Australian Bureau of Statistics, Census of Population and Housing, 2016 and 2021 (Usual residence data). Compiled and presented in profile.id by .id (informed decisions).

Dominant groups

An analysis of the jobs held by the resident population in District Council of Cleve in 2021 shows the three most popular industry sectors were:

- Agriculture, Forestry and Fishing (306 people or 36.6%)
- Health Care and Social Assistance (94 people or 11.2%)
- Retail Trade (73 people or 8.7%)

In combination, these three industries employed 473 people in total or 56.5% of the total employed resident population.

In comparison, Regional SA employed 14.0% in Agriculture, Forestry and Fishing; 13.4% in Health Care and Social Assistance; and 9.5% in Retail Trade.

The major differences between the jobs held by the population of the District Council of Cleve and Regional SA were:

- A *larger* percentage of persons employed in agriculture, forestry and fishing (36.6% compared to 14.0%)
- A *smaller* percentage of persons employed in manufacturing (0.8% compared to 9.0%)
- A *smaller* percentage of persons employed in construction (4.3% compared to 7.9%)
- A *smaller* percentage of persons employed in accommodation and food services (3.9% compared to 6.8%)

Emerging groups

The number of employed people in District Council of Cleve remained stable 0 between 2016 and 2021.

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Occupation of employment

There were more managers in the District Council of Cleve in 2021 than any other occupation.

The District Council of Cleve's occupation statistics quantify the occupations in which the residents work (which may be within the residing area or elsewhere). This will be influenced by the economic base and employment opportunities available in the area, education levels, and the working and social aspirations of the population. When viewed with other indicators, such as **Educational Qualifications** and **Individual Income**, Occupation is a key measure for evaluating the District Council of Cleve's socio-economic status and skill base.

Occupation of employment

Change in occupation of employment, 2016 to 2021

District Council of Cleve - Total employed persons

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Usual residence data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

An analysis of the jobs held by the resident population in District Council of Cleve in 2021 shows the three most popular occupations were:

- Managers (264 people or 31.8%)
- Technicians and Trades Workers (105 people or 12.6%)
- Labourers (99 people or 11.9%)

In combination these three occupations accounted for 468 people in total or 56.3% of the employed resident population.

In comparison, Regional SA employed 16.7% in Managers; 14.1% in Technicians and Trades Workers; and 15.1% in Labourers.

The major differences between the jobs held by the population of the District Council of Cleve and Regional SA were:

- A *larger* percentage of persons employed as Managers (31.8% compared to 16.7%)
- A *smaller* percentage of persons employed as Community and Personal Service Workers (9.0% compared to 12.6%)
- A *smaller* percentage of persons employed as Labourers (11.9% compared to 15.1%)
- A *smaller* percentage of persons employed as Professionals (10.1% compared to 13.1%)

Emerging groups

The number of employed people in District Council of Cleve decreased by 9 between 2016 and 2021.

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Method of travel to work

On Census day 2021 in the District Council of Cleve, 58.0% of people travelled to work in a private car, 0.8% took public transport and 10.8% rode a bike or walked. 19.1% worked at home.

The District Council of Cleve's commuting statistics reveal the main modes of transport by which residents get to work. There are a number of reasons why people use different modes of transport to get to work including the availability of affordable and effective public transport options, the number of motor vehicles available within a household, and the distance travelled to work.

Commuting data is very useful in transport planning as it informs decision-makers about the availability, effectiveness and utilisation of local transport options, particularly when analysed with Residents Place of Work data and Car Ownership.

WARNING: Method of travel to work relates to Census day, which for the 2021 Census occurred during COVID-19 lockdowns for large parts of Australia. In lockdown, many occupations were required to work from home if possible, and some industries were closed, so people did not go to work. For this reason, these categories may have increased, with corresponding declines in other methods of travel. Use the data with caution when comparing over time. For more details, please refer to the [data notes](#).

Change in method of travel to work, 2016 to 2021

District Council of Cleve - Total employed persons

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Usual residence data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

In 2021, there were 7 people who caught public transport to work (train, bus, tram or ferry) in District Council of Cleve, compared with 482 who drove in private vehicles (car – as driver, car – as passenger, motorbike, or truck).

Analysis of the method of travel to work of the residents in the District Council of Cleve in 2021, compared to Regional SA, shows that 0.8% used public transport, while 58.0% used a private vehicle, compared with 0.9% and 70.9% respectively in Regional SA.

The major differences in persons between the method of travel to work of the District Council of Cleve and Regional SA were:

- A *larger* percentage of persons who worked at home (19.1% compared to 8.9%)
- A *larger* percentage of persons who walked only (10.8% compared to 4.6%)
- A *smaller* percentage of persons who travelled by car (as driver) (56.1% compared to 66.3%)
- A *smaller* percentage of persons who did not go to work (7.7% compared to 10.6%)

Emerging groups

The number of employed people in District Council of Cleve decreased by 20 between 2016 and 2021.

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Disengagement by age

In 2021, 8.0% of 15 to 24 year olds in the District Council of Cleve were disengaged with employment and education, compared to 12.2% in Regional SA.

Engagement in employment and education looks at the level of participation by age and sex of the population in the labour market, or full or part-time education. A full time employed or full-time student would be "Fully engaged", while part-time students may be fully engaged if they are also employed, or partly engaged if they are not working. Engagement in the labour and education market is highly dependent on age. Retirees are generally disengaged, while stay-at-home parents are also likely to be disengaged. The rate of engagement, particularly in the younger and working age groups can be affected by access to strong employment and education markets and is a measure of socio-economic status and the level of welfare dependency in an area. For more detail on employment and educational characteristics associated with disengagement, please look at [Employment Status](#), [Qualifications](#) and [Educational Institution Attending](#).

District Council of Cleve - Total disengaged persons under 65 years

Source: Australian Bureau of Statistics, Census of Population and Housing, 2016 and 2021 (Usual residence data). Compiled and presented in profile.id by .id (informed decisions).

Dominant groups

The number of people aged 15 to 24 years in the District Council of Cleve in 2016 was 138, of this, 8.0% were disengaged and 13.0% were partially engaged, compared to 12.2% and 16.4% respectively for Regional SA.

Emerging groups

Between 2016 and 2021, the number of people 15 to 24 years in the District Council of Cleve showed a decrease of -28.

The number of disengaged people aged 15 to 24 years showed a decrease of 6 or 35.3%.

District Council of Cleve

Volunteer work

In District Council of Cleve 37.7% of the population reported doing some form of voluntary work in 2021. This was a greater proportion than Regional SA.

The voluntary work sector is an important part of Australia's economy. The level of volunteering can indicate the cohesiveness of the community and how readily individuals are able to contribute to that community. Factors impacting on the level of volunteering in District Council of Cleve include the Age Structure of the population, the level of Proficiency in English, Income and Education levels.

Volunteer numbers for the 2021 Census declined in many parts of Australia due to lockdowns and COVID-19 distancing measures.

District Council of Cleve

Unpaid domestic work

In the District Council of Cleve 26% of the population over 15 did more than 14 hours of housework each week in 2021.

There has been increased interest in identifying, acknowledging and valuing the unpaid work that supports home and community life. The changing amount of time spent on unpaid housework in different Household Types and, particularly the distribution of this work within the household, can indicate the changing roles of males, females and older children in society. The level of unpaid domestic work in the District Council of Cleve may also be related to Household Income, as higher income households are able to outsource some of these tasks.

Unpaid domestic work

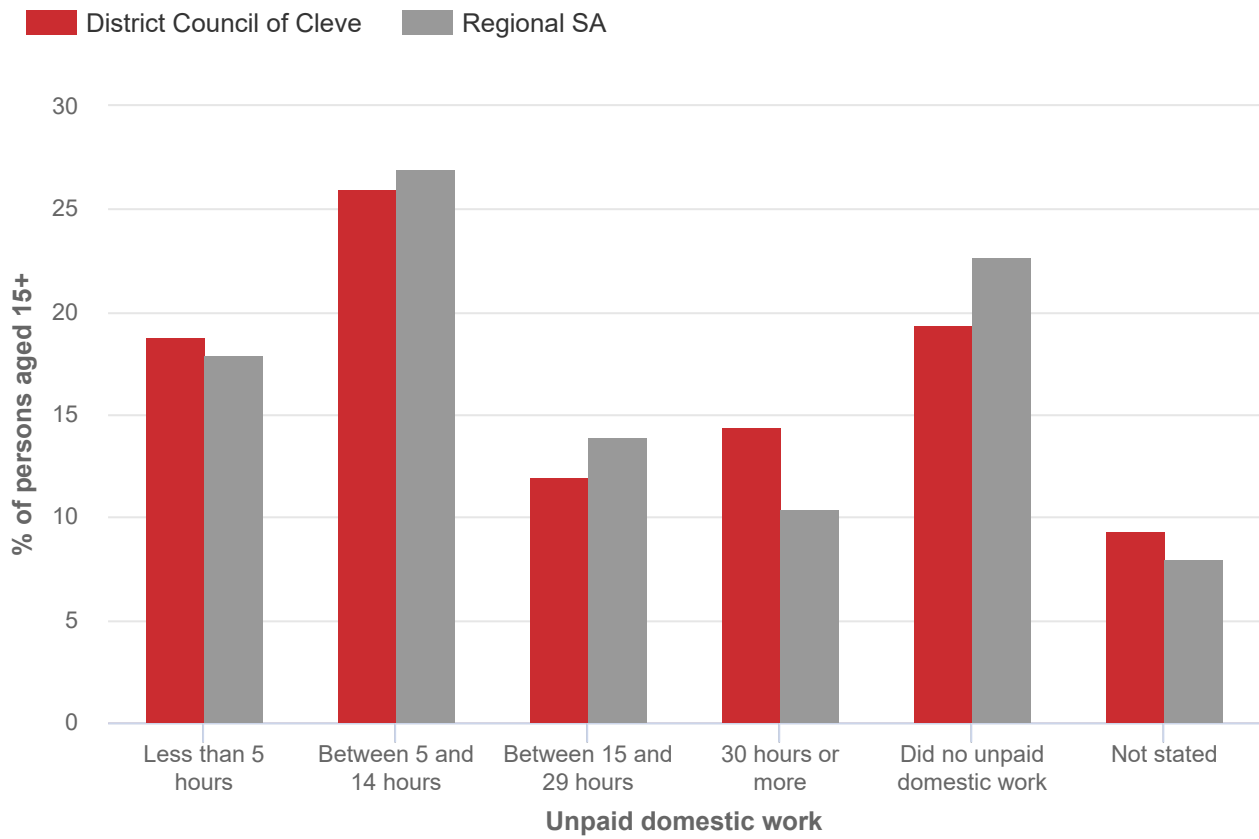

District Council of Cleve - Persons aged 15+ (Usual residence)	2021			2016			Change
Hours spent on unpaid domestic work	Number	%	Regional SA %	Number	%	Regional SA %	2016 to 2021

District Council of Cleve - Total persons

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Usual residence data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

Analysis of the unpaid domestic work performed by the population in the District Council of Cleve in 2021 compared to Regional SA shows that there was a higher proportion of persons who performed 15 hours or more of unpaid domestic work per week.

Overall, 26% of the population reported performing 15 hours or more of unpaid domestic work, compared with 24.4% for Regional SA.

The major differences between the share of the population performing unpaid domestic work in the District Council of Cleve and Regional SA were:

- A *larger* percentage of persons who did 30 hours or more of domestic work (14.4% compared to 10.4%)
- A *larger* percentage of persons who did unpaid domestic work (total) (71.2% compared to 69.3%)
- A *smaller* percentage of persons who did no unpaid domestic work (19.4% compared to 22.7%)
- A *smaller* percentage of persons who did between 15 and 29 hours of domestic work (12.0% compared to 13.9%)

Emerging groups

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Unpaid care

In the District Council of Cleve, 185 carers were providing unpaid assistance to a person with a disability, long term illness or old age in 2021. This represents 13.2% of the population aged 15+.

The proportion of people providing unpaid care for the aged and disabled in the District Council of Cleve can be an important indicator of the level of demand for aged care services and facilities by local and state governments. An increasing proportion of carers among the population may indicate inadequate aged care provision, or the need for in-home support, or support for the carers themselves. The level of care provided by individuals is likely to be affected by Household Income, Age Structure and the ethnic makeup of the community (Language Spoken), as well as the sense of community cohesiveness.

Unpaid care

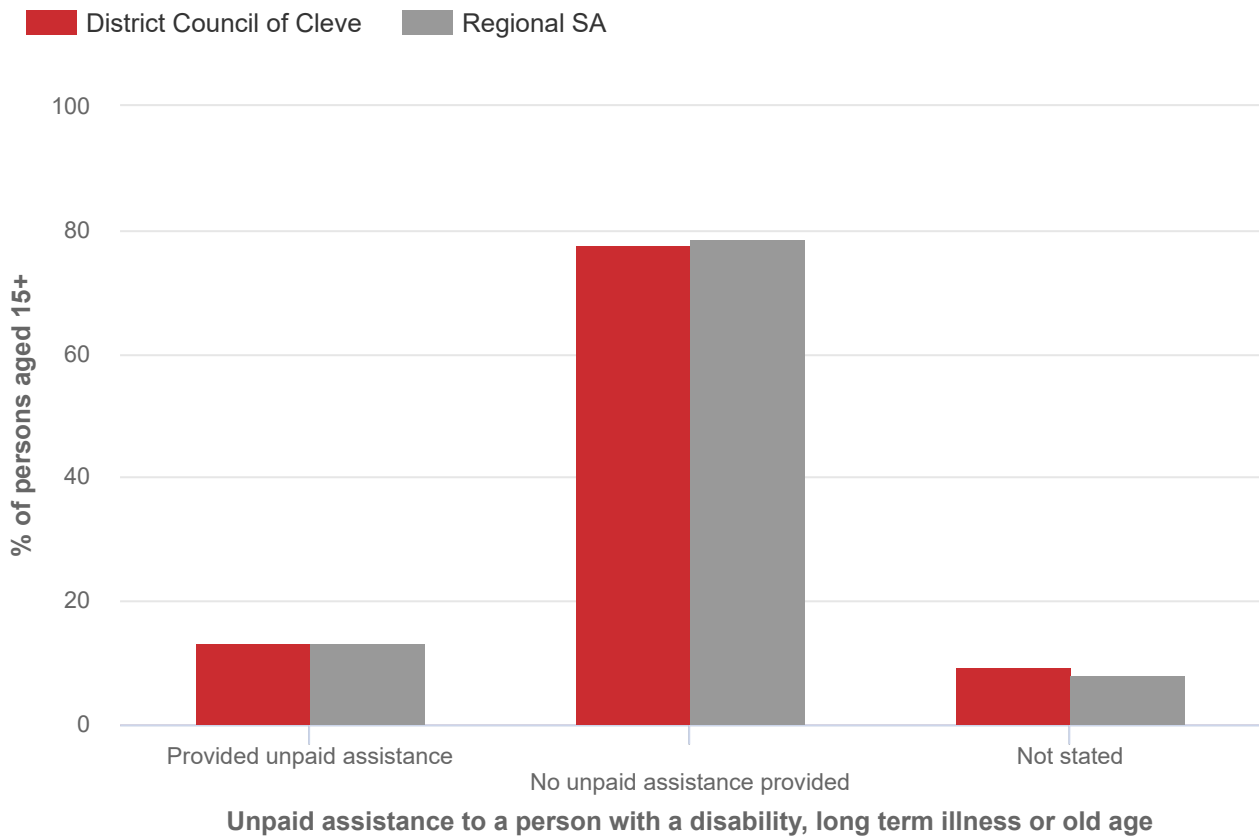

District Council of Cleve - Persons aged 15+ (Usual residence)	2021			2016			Change
Assistance to a person with a disability, long term illness or old age	Number	%	Regional SA %	Number	%	Regional SA %	2016 to 2021

District Council of Cleve - Total persons

Source: Australian Bureau of Statistics, Census of Population and Housing, 2016 and 2021 (Usual residence data). Compiled and presented in profile.id by .id (informed decisions).

Dominant groups

Analysis of the unpaid care provided by the population in the District Council of Cleve in 2021 compared to Regional SA shows that there was a similar proportion of people who provided unpaid care either to family members or others.

Overall, 13.2% of the population provided unpaid care, compared with 13.2% for Regional SA.

Emerging groups

The number of people who provided unpaid assistance to a person with a disability, long term illness or old age in the District Council of Cleve increased by 51 between 2016 and 2021.

District Council of Cleve

Unpaid childcare

In the District Council of Cleve 407 people (29.0% of people aged 15+) provided unpaid care to children in 2021. Of these, 127 people were caring for children other than their own.

The role of unpaid childcare in the District Council of Cleve is determined by many different factors. For example areas with high levels of unpaid child care may have a dominance of single income families with one significant earner, or there could be a lack of provision of paid child care in the area. The level to which people care for others children can also indicate the role of extended family (eg. grandparents caring for grandchildren, family day care).

The role of unpaid child care is a complex one so this topic should be viewed in conjunction with several others, including Household Type, Employment, Household Income and Educational Attendance.

Unpaid childcare

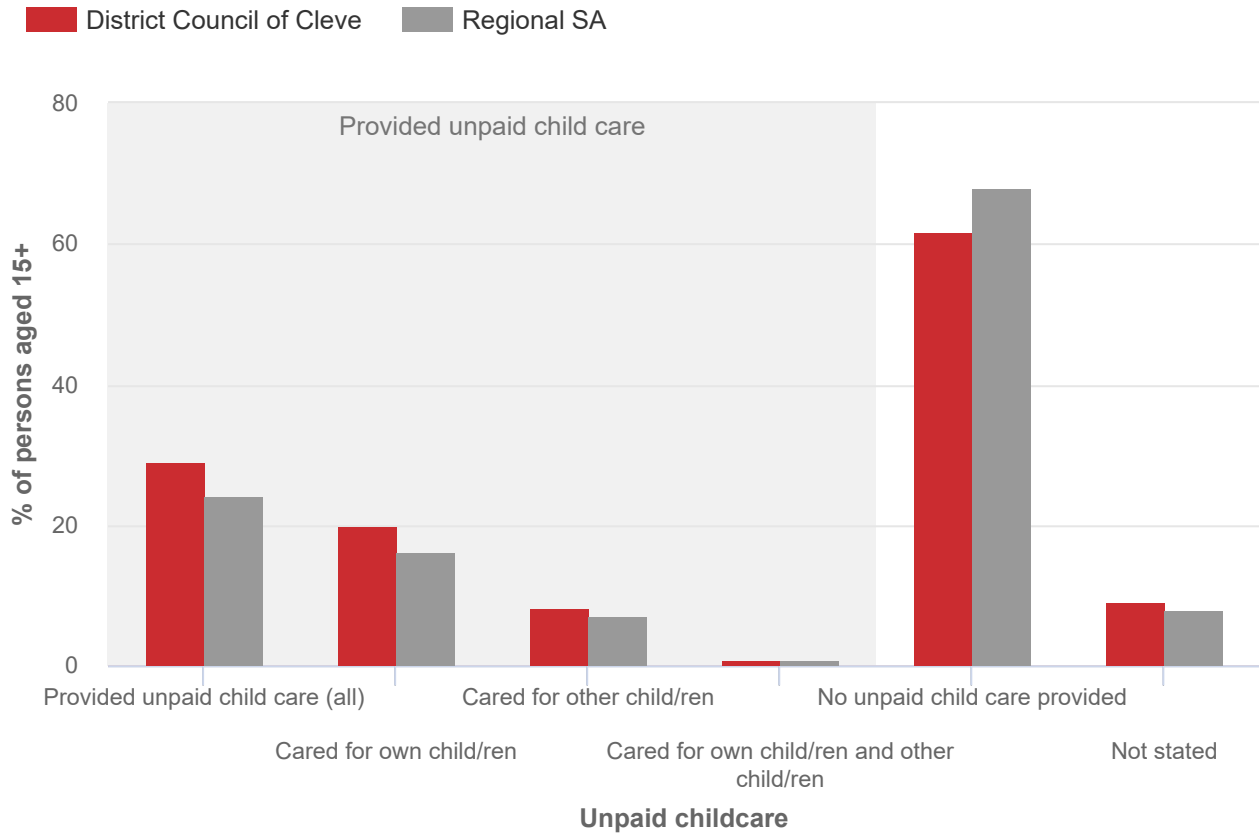

District Council of Cleve - Persons aged 15+ (Usual residence)	2021			2016			Change

District Council of Cleve - Total persons

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Usual residence data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

Analysis of the unpaid child care provided by the population in the District Council of Cleve in 2021 compared to Regional SA shows that there was a higher proportion of people who provided unpaid child care either to their own or to other children. Overall, 29.0% of the population provided unpaid child care, compared with 24.3% for Regional SA.

The major differences between the share of the population providing unpaid child care in the District Council of Cleve and Regional SA were:

- A *larger* percentage who provided unpaid childcare for own child/ren (20.0% compared to 16.2%)
- A *larger* percentage who provided unpaid childcare for other child/ren (8.3% compared to 7.2%)
- A *smaller* percentage who did not provide care for children (61.8% compared to 67.9%)

Emerging groups

The number of people who provided unpaid child care for their own and/or other people's children in District Council of Cleve decreased by 1 between 2016 and 2021.

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Individual income

In the District Council of Cleve, 4.9% of the population earned an income of \$2,000 or more per week in 2021.

Individual Income statistics are an indicator of socio-economic status. With other data sources, such as Household Income, Qualifications and Occupation, they help tell the story of the economic opportunities and socio-economic status of the District Council of Cleve. The amount of income an individual receives is linked to a number of factors including employment status, age (as for instance students and retirees often receive a lower income), qualifications and type of employment.

The incomes presented on this page are for the latest Census year only. For comparison of incomes over time, go to Individual Income Quartiles.

Weekly individual income

Weekly individual income, 2021

Total persons

Source: Australian Bureau of Statistics, [Census of Population and Housing, 2021](#) (Usual residence data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

Analysis of individual income levels in the District Council of Cleve in 2021 compared to Regional SA shows that there was a lower proportion of people earning a high income (those earning \$2,000 per week or more) as well as a lower proportion of low income people (those earning less than \$500 per week).

Overall, 4.9% of the population earned a high income, and 36.3% earned a low income, compared with 6.5% and 36.9% respectively for Regional SA.

The major differences between the District Council of Cleve's individual incomes and Regional SA's individual incomes were:

- A *larger* percentage of persons who earned \$1,000 - \$1,249 (10.5% compared to 8.7%)
- A *larger* percentage of persons who earned \$1 - \$149 (4.4% compared to 3.2%)
- A *smaller* percentage of persons who earned \$300 - \$399 (9.3% compared to 10.8%)
- A *smaller* percentage of persons who earned \$400 - \$499 (9.7% compared to 10.8%)

District Council of Cleve

Individual income quartiles

In the District Council of Cleve, the 'lowest' income quartile was the largest group in 2021, comprising 27% of people aged 15 and over.

the District Council of Cleve's income statistics are an indicator of socio-economic status. With other data sources, such as Household Income, Qualifications and Occupation, they help tell the story of the area's economic opportunities and socio-economic status. Individual income levels are not comparable over time because of the influences of economic change such as wage level fluctuations and inflation. The income quartile method is the most objective method of comparing change in the income profile of a community over time.

A detailed explanation of how Individual Income quartiles are calculated and interpreted is available in [specific data notes](#).

Individual income quartiles

District Council of Cleve

Source: Australian Bureau of Statistics, Census of Population and Housing, 2016 and 2021 (Usual residence data). Compiled and presented in profile.id by .id (informed decisions).

Dominant groups

Income quartiles allow us to compare relative income-earning capabilities across time. Analysis of the distribution of the population by income quartile in District Council of Cleve compared to Regional SA shows that there was lesser proportion of persons in the highest income quartile and a greater proportion in the lowest income quartile.

Emerging groups

The most significant change in District Council of Cleve in persons between 2016 and 2021 was in the highest quartile which showed a slight decrease of -74 persons.

District Council of Cleve

Household income

In the District Council of Cleve, 9.1% of households earned an income of \$3,000 or more per week in 2021.

Households form the common 'economic unit' in our society. the District Council of Cleve's Household Income is one of the most important indicators of socio-economic status. With other data sources, such as [Qualifications](#) and [Occupation](#), it helps to reveal the economic opportunities and socio-economic status of the District Council of Cleve. It is important to note that income data is not necessarily a measure of wealth. For example, if an area has a large number of retirees this will produce a higher proportion of households with low income but the retirees may have large capital wealth. For this reason, household income should be viewed in conjunction with [Age](#) and [Household Composition](#).

The incomes presented on this page are for the latest Census year only. For comparison of incomes over time, go to [Household Income Quartiles](#).

[Learn more about the characteristics of low-income households here.](#)

Weekly household income, 2021

Source: Australian Bureau of Statistics, Census of Population and Housing, 2021 (Enumerated data). Compiled and presented in profile.id by .id (informed decisions).

Dominant groups

Analysis of household income levels in the District Council of Cleve in 2021 compared to Regional SA shows that there was a smaller proportion of high income households (those earning \$3,000 per week or more) and a higher proportion of low income households (those earning less than \$800 per week).

Overall, 9.1% of the households earned a high income and 31.5% were low income households, compared with 10.7% and 30.9% respectively for Regional SA.

The major differences between the household incomes of the District Council of Cleve and Regional SA were:

- A *larger* percentage of households who earned \$1,000 - \$1,249 (9.8% compared to 8.3%)
- A *larger* percentage of households who earned \$150 - \$299 (3.2% compared to 1.7%)
- A *smaller* percentage of households who earned \$500 - \$649 (3.3% compared to 5.7%)
- A *smaller* percentage of households who earned \$2,000 - \$2,499 (7.4% compared to 9.3%)

District Council of Cleve

Household income quartiles

In the District Council of Cleve, the 'lowest' quartile was the largest group in 2021, comprising 32% of households with income.

Households form the common 'economic unit' in our society. Household Income is one of the most important indicators of socio-economic status. With other data sources, such as **Qualifications** and **Occupation**, it helps to reveal the District Council of Cleve's socio-economic status and economic opportunities. Household income levels are not comparable over time because of the influences of economic change such as wage level fluctuations and inflation. The income quartile method is a powerful and objective way of looking at income data and in particular, how it is changing.

A detailed explanation of how Household Income quartiles are calculated and interpreted is available in [specific data notes](#).

Dominant groups

Income quartiles allow us to compare relative income-earning capabilities across time. Analysis of the distribution of households by income quartile in District Council of Cleve compared to Regional SA shows that there was lesser proportion of households in the highest income quartile and a greater proportion in the lowest income quartile.

Emerging groups

The most significant change in District Council of Cleve between 2016 and 2021 was in the highest quartile which showed a slight decrease of -51 households.

District Council of Cleve

Equivalised household income

Assuming all households were the same size, the 'lowest' quartile was the largest income group in the District Council of Cleve in 2021.

While Household Income is a useful measure, it is difficult to tell if changes over time and between geographic areas are due to actual changes in income levels, or due to changes in household size and composition. For example, an increase in lower income households could be due to job losses in key economic sectors, or simply due to decreasing household size as adult children leave home.

Equivalised Household Income puts all households on an equal footing independent of household size and composition to enable a true comparison between areas and over time. It is an indicator of the income resource available to a household of standard size and is the best measure of the changing economic fortunes of households living in the District Council of Cleve.

A detailed explanation of how Equivalised Household Income quartiles are calculated and interpreted is available in [specific data notes](#).

Learn more about the characteristics of low-income households [here](#).

District Council of Cleve

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Enumerated data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

Equivalised income quartiles allow us to compare relative income-earning capabilities across time. Because the data is equivalised, households of different size and composition are placed on an equal footing.

Analysis of the distribution of households by income quartile in the District Council of Cleve compared to Regional SA shows that there was a lesser proportion of households in the highest equivalised income quartile, and a greater proportion in the lowest equivalised income quartile.

Emerging groups

The most significant change in District Council of Cleve between 2016 and 2021 was in the lowest quartile which showed an increase of 42 households.

District Council of Cleve

Household type

In the District Council of Cleve, 23.7% of households were made up of couples with children in 2021, compared with 21.2% in Regional SA.

The District Council of Cleve's household and family structure is one of the most important demographic indicators. It reveals the area's residential role and function, era of settlement and provides key insights into the level of demand for services and facilities as most are related to age and household types.

To continue building the story, the District Council of Cleve's Household Summary should be viewed in conjunction with Households with Children, Households without Children, Household Size, Age Structure and Dwelling Type.

If you're looking at this data to prepare a housing strategy, learn more here.

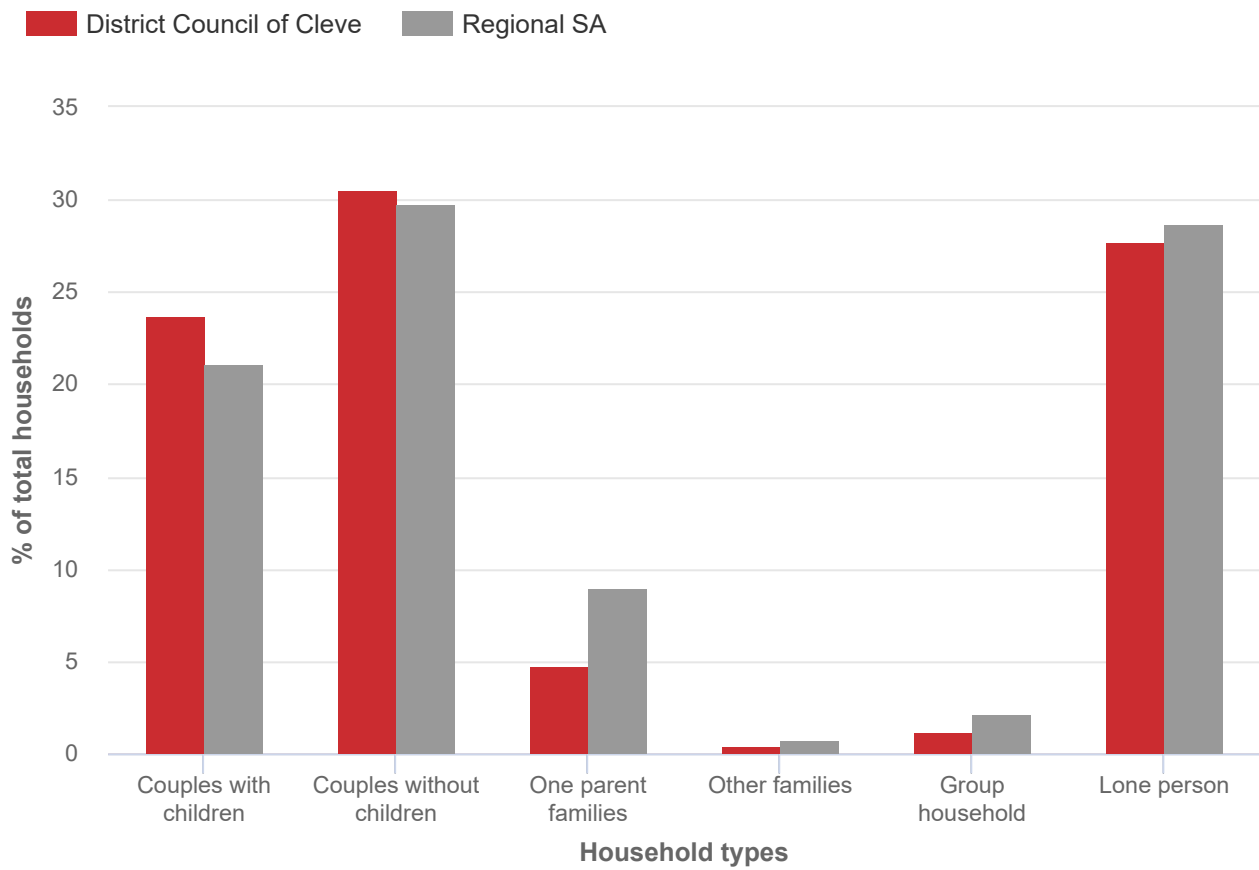

Household type

Change in household type, 2016 to 2021

District Council of Cleve

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Enumerated data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

Analysis of the household/family types in the District Council of Cleve in 2021 compared to Regional SA shows that there was a higher proportion of couple families with child(ren) as well as a lower proportion of one-parent families. Overall, 23.7% of total families were couple families with child(ren), and 4.8% were one-parent families, compared with 21.2% and 9.0% respectively for Regional SA.

There were a lower proportion of lone person households and a higher proportion of couples without children. Overall, the proportion of lone person households was 27.7% compared to 28.7% in Regional SA while the proportion of couples without children was 30.5% compared to 29.8% in Regional SA.

Emerging groups

The number of households in District Council of Cleve decreased by 104 between 2016 and 2021.

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Households with children

There are 110 couples with young children in the District Council of Cleve in 2021, comprising 14.6% of households.

Households with Children require different services and facilities than other household types, and their needs change as both adults and children age. When many families in an area are at the same stage in their individual lifecycles, it creates a suburb lifecycle. Knowing where a suburb is in a cycle of change helps planners make evidence-based decisions about the demand for services both now and in the future.

For Households with Children in the District Council of Cleve, life stage is based on the age of children in the household. The age of the parent(s) is not taken into account.

- **Young children:** Children aged under 15 only
- **Mixed age children:** One or more children under 15 and one or more children over 15 (must have 2 or more children)
- **Older children:** Children aged 15 and over only

To continue building the story, the District Council of Cleve's Household data should be viewed in conjunction with Household Size, Age Structure and Dwelling Type.

Households with children by life stage

District Council of Cleve - Households (Enumerated)	2021			2016			Change
Households with children	Number	%	Regional SA %	Number	%	Regional SA %	2016 to 2021

Change in households with children, 2016 to 2021

District Council of Cleve

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Enumerated data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

Analysis of the families with children in the District Council of Cleve in 2021 compared to Regional SA shows that there was a larger proportion of couples with young children, and a smaller proportion of couples with older children.

Overall, 14.6% of total households with children were couple with young children, and 5.4% were couples with older children, compared with 11.4% and 6.4% respectively for Regional SA.

There were a smaller proportion of single parent households with young children and a smaller proportion of single parent households with older children. Overall, the proportion of single parent households with young children was 2.0% compared to 3.8% in Regional SA while the proportion of single parent households with older children was 2.4% compared to 4.1% in Regional SA.

Emerging groups

Between 2016 and 2021, the number of households with children decreased by 6 households or 2.7%.

There were no major differences between 2016 and 2021 in District Council of Cleve.

District Council of Cleve

Households without children

In the District Council of Cleve, older couples without children account for 17% of total households in 2021.

Households without Children include couples without children and lone person households. They require different services depending on the age of the people in the households. For example young couples who have not had children (yet) compared to older "empty nester" couples whose children may have left home.

For Households without Children in the District Council of Cleve, life stage is based on the age of the household reference person (usually person 1 on the Census form):

- **Young:** Aged 15-44
- **Middle-aged:** Aged 45-64
- **Older:** Aged 65 and over

To continue building the story, the District Council of Cleve's Household data should be viewed in conjunction with Household Size, Age Structure and Dwelling Type.

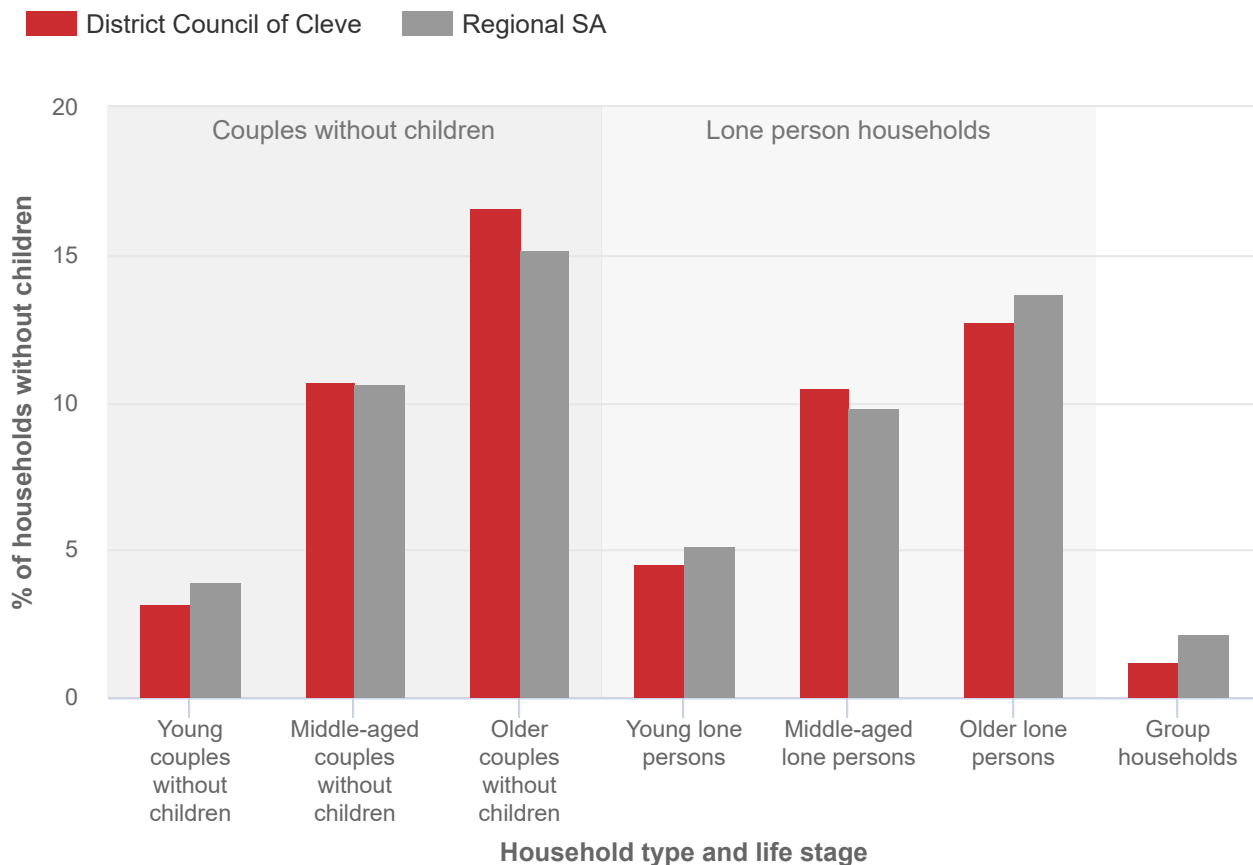

Households without children by life stage

District Council of Cleve - Households (Enumerated)	2021			2016			Change
Households without children	Number	%	Regional SA %	Number	%	Regional SA %	2016 to 2021

Change in households without children, 2016 to 2021

District Council of Cleve

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Enumerated data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

Analysis of the households without children in the District Council of Cleve in 2021 compared to Regional SA shows that there was a smaller proportion of young couples without children, a similar proportion of middle-aged couples without children, and a larger proportion of older couples without children.

In addition, there were a smaller proportion of young lone person households, a larger proportion of middle-aged lone person households, and a smaller proportion of older lone person households.

Emerging groups

Between 2016 and 2021, the number of households without children decreased by 13.

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Household size

In 2021, 31% of households in the District Council of Cleve contained only one person, compared with 31.3% in Regional SA, with the most dominant household size being 2 persons per household.

The size of households in general follows the life-cycle of families. Households are usually small at the stage of relationship formation (early marriage), and then increase in size with the advent of children. They later reduce in size again as these children reach adulthood and leave home. Household size can also be influenced by a lack (or abundance) of affordable housing. Overseas migrants and indigenous persons often have a tradition of living with extended family members which significantly affects household size.

Household size in Australia has generally declined since the 1970s, but the rate of decline has slowed in recent years.

An increasing household size in an area may indicate a lack of affordable housing opportunities for young people, an increase in the birth rate or an increase in family formation in the area. A declining household size may indicate children leaving the area when they leave home, an increase in retirees settling in the area, or an attraction of young singles and couples to the area.

For greater insight, the District Council of Cleve's Household Size data should be viewed in conjunction with Household Summary, Age Structure, Dwelling Type, Household Income and Language Spoken at Home.

Household size

District Council of Cleve - Households (Enumerated)	2021			2016			Change

District Council of Cleve

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Enumerated data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

Analysis of the number of persons usually resident in a household in the District Council of Cleve compared with Regional SA shows that there were a similar proportion of lone person households, and a higher proportion of larger households (those with 4 persons or more). Overall there were 31.4% of lone person households, and 21.9% of larger households, compared with 31.3% and 18.0% respectively for Regional SA.

The major differences in the household size for the District Council of Cleve and Regional SA were:

- A *larger* percentage of households with 4 persons usually resident (12.9% compared to 10.7%)
- A *larger* percentage of households with 5 persons usually resident (6.1% compared to 5.0%)
- A *smaller* percentage of households with 3 persons usually resident (8.4% compared to 12.0%)

Emerging groups

The number of households in District Council of Cleve decreased by 13 between 2016 and 2021.

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Family blending

In 2021, the District Council of Cleve had 4.4% of couple families with children in step families and 5.0% in blended families.

Information on blended and intact families can be an indicator of the level of family breakup and repartnering within the area, and a potential indicator of socio-economic disadvantage. Family blending only applies to couple families with children. For information more broadly about household and family types, including single-parent families, please see Household Type, Households with Children, and Households without Children.

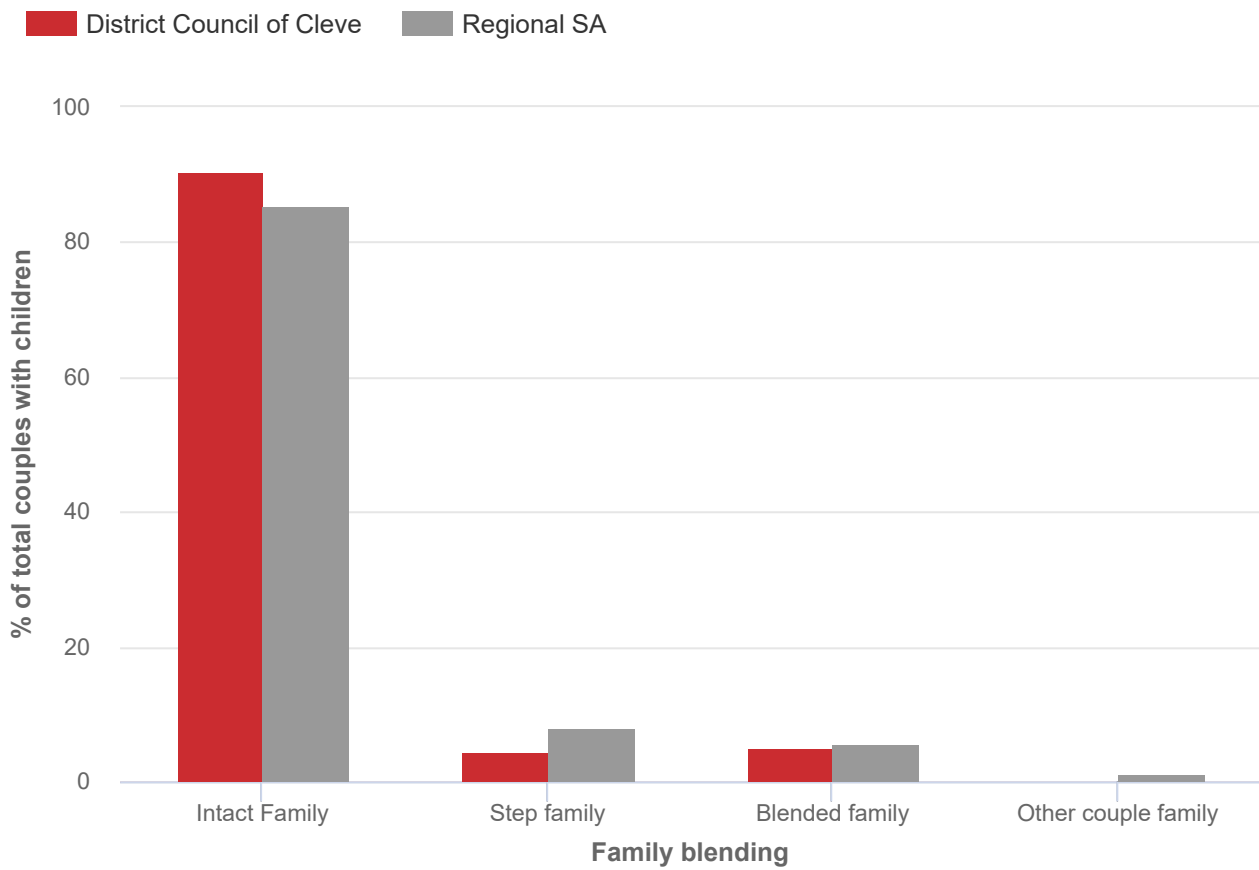

Family blending

District Council of Cleve - Total couples with children (Enumerated)	2021			2016			Change
Family blending by type	Number	%	Regional SA %	Number	%	Regional SA %	2016 to 2021

District Council of Cleve

Source: Australian Bureau of Statistics, Census of Population and Housing, 2016 and 2021 (Enumerated data). Compiled and presented in profile.id by .id (informed decisions).

Dominant groups

Analysis of the family blending in the District Council of Cleve in 2021 compared to Regional SA shows that there was a lower proportion of step families as well as a lower proportion of blended families. Overall, 4.4% of total couple families with children were step families, and 5.0% were blended families, compared with 7.9% and 5.5% respectively for Regional SA.

There were a lower proportion of other families and a higher proportion of couples without children. Overall, the proportion of other families was 0.0% compared to 1.1% in Regional SA while the proportion of intact families was 90.6% compared to 85.5% in Regional SA.

Emerging groups

The number of couple families with children in District Council of Cleve increased by 2 between 2016 and 2021.

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Dwelling type

In the District Council of Cleve, 3.2% of the dwellings were medium or high density, compared to 11% in Regional SA.

Dwelling Type is an important determinant of the District Council of Cleve's residential role and function. A greater concentration of higher density dwellings is likely to attract more young adults and smaller households, often renting. Larger, detached or separate dwellings are more likely to attract families and prospective families. The residential built form often reflects market opportunities or planning policy, such as building denser forms of housing around public transport nodes or employment centres.

Dwelling Type statistics should be viewed in conjunction with Household Size, Household Types, Housing Tenure and Age Structure for a more complete picture of the housing market in the District Council of Cleve.

If you're looking at this data to prepare a housing strategy, learn more here.

Dominant groups

In 2021, there were 914 separate houses in the area, 31 medium density dwellings, and no high density dwellings. In addition, there were 16 caravans/cabins/houseboats in the area.

Analysis of the types of dwellings in the District Council of Cleve in 2021 shows that 93.9% of all dwellings were separate houses; 3.2% were medium density dwellings, and 0% were in high density dwellings, compared with 86.5%, 10.6%, and 0.2% in the Regional SA respectively.

In 2021, a total of 78.1% of the dwellings in the District Council of Cleve were occupied on Census night, compared to 79.2% in Regional SA. The proportion of unoccupied dwellings was 21.6%, which is larger compared to that found in Regional SA (20.5%).

Emerging groups

The total number of dwellings in the District Council of Cleve decreased by 89 between 2016 and 2021.

The largest change in the type of dwellings found in the District Council of Cleve between 2016 and 2021 was:

- Caravans, cabin, houseboat (-86 dwellings)

District Council of Cleve

Number of bedrooms per dwelling

Dwellings with 3 bedrooms were the most common in the District Council of Cleve in 2021.

The Number of Bedrooms in a dwelling is an indicator of the size of dwellings, and when combined with Dwelling Type information, provides insight into the role the District Council of Cleve plays in the housing market. For example, an area of high density dwellings that are predominantly 1-2 bedroom are likely to attract students, single workers and young couples, whereas a high density area with dwellings that are predominantly 2-3 bedroom may attract more empty nesters and some families.

In combination with Household Type and Household Size, the Number of Bedrooms can also indicate issues around housing affordability, overcrowding and other socio-economic factors.

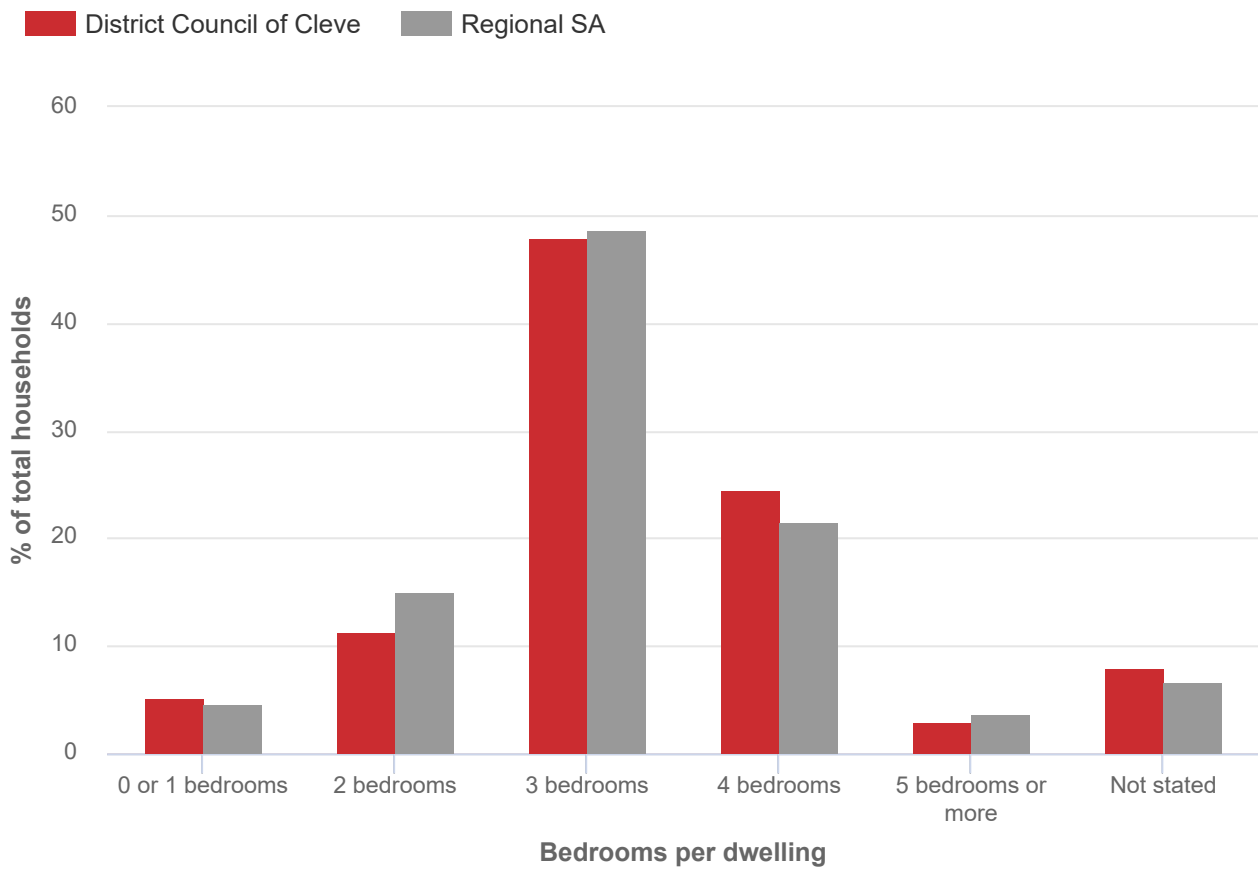

Number of bedrooms per dwelling

District Council of Cleve - Households (Enumerated)	2021			2016			Change
Number of bedrooms	Number	%	Regional SA %	Number	%	Regional SA %	2016 to 2021
0 or 1 bedrooms	39	5.2	4.6	58	6.7	4.1	-19

District Council of Cleve

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Enumerated data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

Analysis of the number of bedrooms in dwellings in District Council of Cleve in 2021 compared to Regional SA shows that there was a lower proportion of dwellings with 2 bedrooms or less, and a higher proportion of dwellings with 4 or more bedrooms.

Overall, 16.5% of households were in dwellings with 2 bedrooms or less, and 27.5% of 4 or more bedroom dwellings, compared with 19.6% and 25.2% for Regional SA respectively.

The major differences between the number of bedrooms per dwelling of the District Council of Cleve and Regional SA were:

- A *larger* percentage of 4 bedroom dwellings (24.4% compared to 21.5%)
- A *smaller* percentage of 2 bedroom dwellings (11.4% compared to 15.0%)

Emerging groups

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Internet connection

In 2016, 168 households in the District Council of Cleve (19.6%) did not have an internet connection at the dwelling.

Please note: For the 2021 Census, the ABS dropped the question regarding household internet connection. This page shows data for the 2016 and previous Censuses only.

An internet connection is now an important utility for most households in Australia. It is increasingly required for accessing essential information and taking part in the digital economy. Australia-wide in 2016, nearly 80% of all households had internet access. However, this decreases with age – seniors are less likely to have internet access at home. The lack of internet access is likely to indicate a level of disadvantage and could be related to socio-economic factors, age, or geographical isolation.

Internet connectivity in the District Council of Cleve should be looked at in conjunction with Household Type and Age Structure, as well as Education Levels.

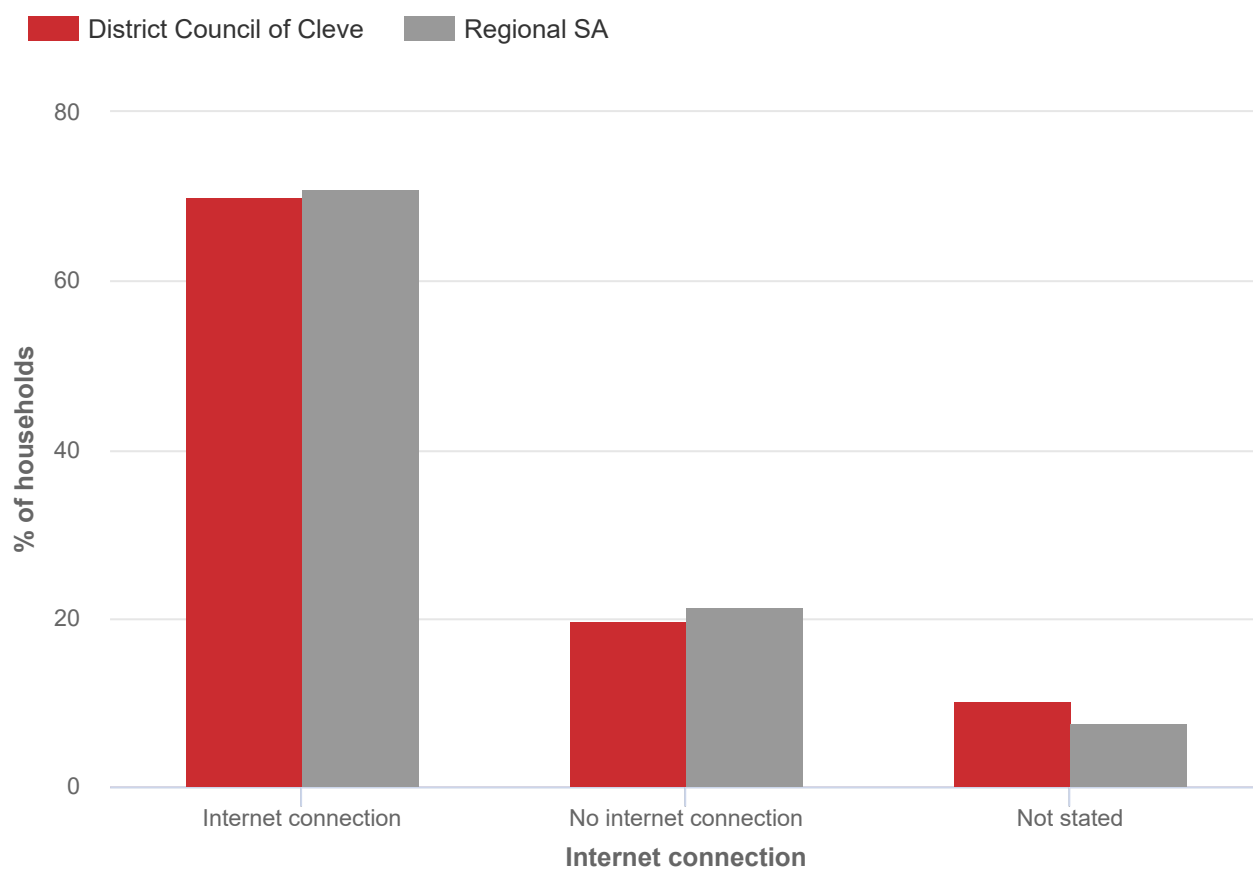

Type of internet connection

District Council of Cleve - Households	2016			2011			Change
Connection type	Number	%	Regional SA %	Number	%	Regional SA %	2011 to 2016

District Council of Cleve

Source: Australian Bureau of Statistics, Census of Population and Housing, 2011 and 2016 (Enumerated data). Compiled and presented in profile.id by .id (informed decisions).

Dominant groups

Analysis of the type of internet connection of households in the District Council of Cleve compared to Regional SA shows that there was a lower proportion of households with an internet connection

Overall 70.1% of households had an internet connection, compared with 70.9% in Regional SA.

Emerging groups

Between 2011 and 2016 the number of households with an internet connection increased by 104.

District Council of Cleve

Number of cars per household

Analysis of car ownership in 2021, indicates 60% of households in the District Council of Cleve had access to two or more motor vehicles, compared to 55% in Regional SA.

The ability of the population to access services and employment is strongly influenced by access to transport. The number of motor vehicles per household in the District Council of Cleve quantifies access to private transport and will be influenced by **Age Structure** and **Household Type**, which determine the number of adults present; access to **Public Transport**; distance to shops, services, employment and education; and **Household Income**. Depending on these factors, car ownership can be seen as a measure of advantage or disadvantage, or a neutral socio-economic measure, which impacts on the environment and quality of life.

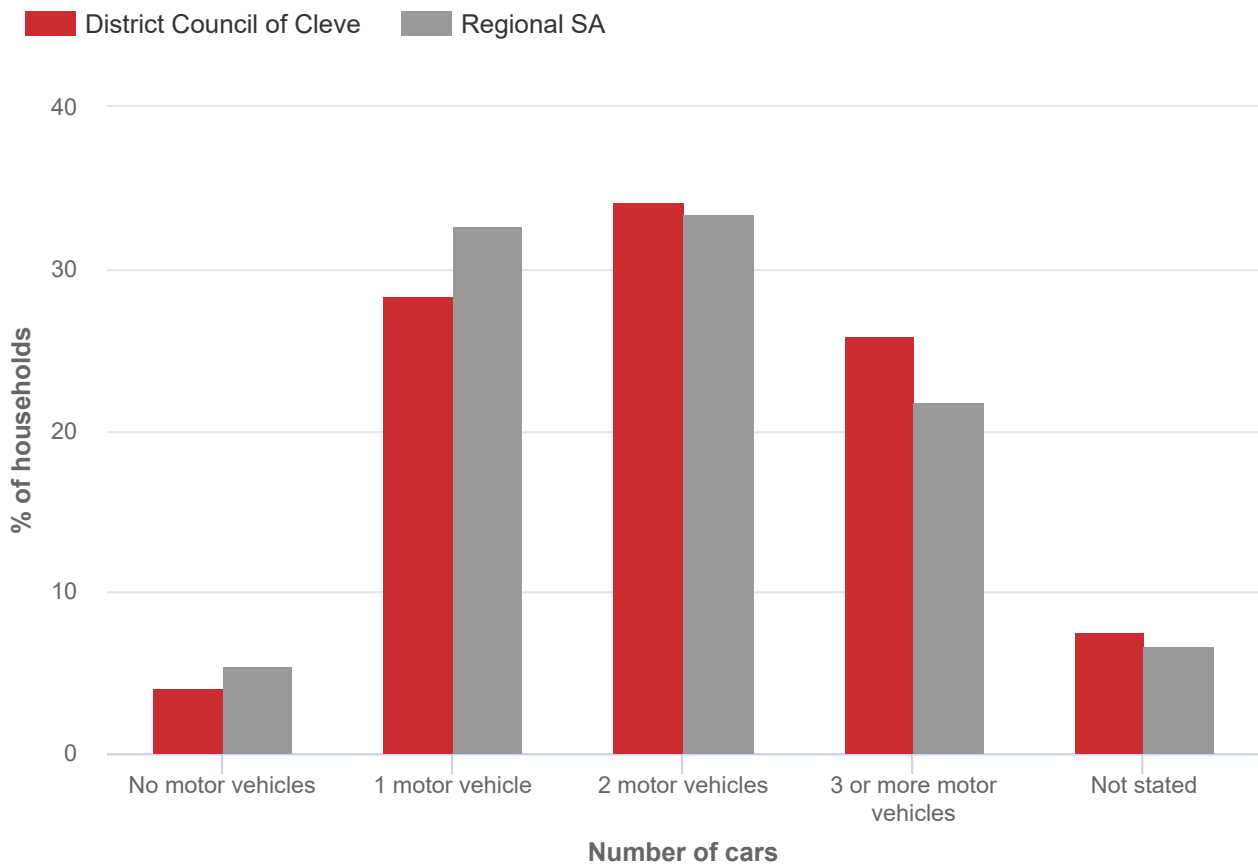

Car ownership

District Council of Cleve - Households (Enumerated)	2021			2016			Change
Number of cars	Number	%	Regional SA %	Number	%	Regional SA %	2016 to 2021
No motor vehicles	31	4.1	5.4	32	3.7	5.6	-1
1 motor vehicle	214	28.3	32.8	255	29.6	32.2	-41
2 motor vehicles	258	34.1	33.5	256	29.7	33.5	+2
3 or more motor vehicles	196	25.9	21.7	219	25.4	20.1	-23

Change in car ownership, 2016 to 2021

District Council of Cleve

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Enumerated data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

Analysis of the car ownership of the households in the District Council of Cleve in 2021 compared to Regional SA shows that 88.4% of the households owned at least one car, while 4.1% did not, compared with 88.0% and 5.4% respectively in Regional SA.

Of those that owned at least one vehicle, there was a smaller proportion who owned just one car; a larger proportion who owned two cars; and a larger proportion who owned three cars or more.

Overall, 28.3% of the households owned one car; 34.1% owned two cars; and 25.9% owned three cars or more, compared with 32.8%; 33.5% and 21.7% respectively for Regional SA.

Emerging groups

There were no major differences in the District Council of Cleve between 2016 and 2021.

District Council of Cleve

Housing tenure

In the District Council of Cleve, 69% of households were purchasing or fully owned their home, 13.7% were renting privately, and 3.2% were in social housing in 2021.

The District Council of Cleve's Housing Tenure data provides insights into its socio-economic status as well as the role it plays in the housing market. For example, a high concentration of private renters may indicate a transient area attractive to young singles and couples, while a concentration of home owners indicates a more settled area with mature families and empty-nesters (**Household Summary**). Tenure can also reflect built form (**Dwelling Type**), with a significantly higher share of renters in high density housing and a substantially larger proportion of home-owners in separate houses, although this is not always the case.

In conjunction with other socio-economic status indicators in the District Council of Cleve, Tenure data is useful for analysing housing markets, housing affordability and identifying public housing areas.

Change in housing tenure, 2016 to 2021

District Council of Cleve

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Enumerated data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

Analysis of the housing tenure of households of the District Council of Cleve in 2021 compared to Regional SA shows that there was a larger proportion of households who owned their dwelling; a smaller proportion purchasing their dwelling; and a smaller proportion who were renters.

Overall, 47.3% of households owned their dwelling; 21.9% were purchasing, and 16.8% were renting, compared with 37.6%, 28.4% and 23.8% respectively for Regional SA.

Emerging groups

There were no major differences in the District Council of Cleve between 2016 and 2021.

The total number of households in District Council of Cleve decreased by 101 between 2016 and 2021.

District Council of Cleve

Housing loan repayments

In the District Council of Cleve, 3.1% of households with a mortgage were making high loan repayments of \$2,600 or more per month in 2021.

Mortgage repayments are directly related to house prices in the District Council of Cleve, length of occupancy and the level of equity of home owners. When viewed with **Household Income** data it may also indicate the level of housing stress households in the community are under. In mortgage belt areas it is expected that households will be paying a higher proportion of their income on their housing compared to well-established areas. First home buyer areas are also likely to have larger mortgages than upgrader areas where households move in with equity from elsewhere.

Mortgage payment levels are not directly comparable over time because of inflation. For comparison of mortgage payments over time, go to **Housing Loan Quartiles**.

Please note, interest rates at the 2021 Census were at a record low in Australia. The first interest rate rises by the Reserve Bank began an upward cycle from May 2022. Please use mortgage payment data with caution as data from the 2021 Census pre-dates all official rate rises in the current cycle.

Monthly housing loan repayments, 2021

Source: Australian Bureau of Statistics, Census of Population and Housing, 2021 (Enumerated data). Compiled and presented in profile.id by .id (informed decisions).

Dominant groups

Analysis of the monthly housing loan repayments of households in the District Council of Cleve compared to Regional SA shows that there was a smaller proportion of households paying high mortgage repayments (\$2,600 per month or more), and a larger proportion of households with low mortgage repayments (less than \$1,200 per month).

Overall, 3.1% of households were paying high mortgage repayments, and 61.0% were paying low repayments, compared with 6.1% and 49.4% respectively in Regional SA.

The major differences between the household loan repayments of the District Council of Cleve and Regional SA were:

- A *larger* percentage of \$600 - \$999 (28.9% compared to 21.9%)
- A *larger* percentage of \$300 - \$599 (14.5% compared to 9.6%)
- A *larger* percentage of \$299 or less (10.1% compared to 5.8%)
- A *smaller* percentage of \$1,000 - \$1,199 (7.5% compared to 12.2%)

District Council of Cleve

Housing loan quartiles

In the District Council of Cleve, the 'lowest group' was the largest quartile, comprising of 57% of households with mortgages in 2021.

Mortgage repayments in the District Council of Cleve are directly related to house prices, length of occupancy and the level of equity of home owners. When viewed with Household Income data it may also indicate the level of housing stress in the community.

The quartile method is the most objective method of comparing change in the mortgage payment profile of a community over time.

A detailed explanation of how Housing Loan Repayment quartiles are calculated and interpreted is available in [specific data notes](#).

Please note, interest rates at the 2021 Census were at a record low in Australia. The first interest rate rises by the Reserve Bank began an upward cycle from May 2022. Please use mortgage payment data with caution as data from the 2021 Census pre-dates all official rate rises in the current cycle.

Change in housing loan quartiles, 2016 to 2021

District Council of Cleve

Source: Australian Bureau of Statistics, [Census of Population and Housing](#), 2016 and 2021 (Enumerated data). Compiled and presented in profile.id by [.id](#) (informed decisions).

Dominant groups

Housing loan repayment quartiles allow us to compare relative repayment liabilities across time. Analysis of the distribution of households by housing loan repayment quartiles in the District Council of Cleve compared to Regional SA shows that there was a smaller proportion of households in the highest repayment quartile, and a larger proportion in the lowest repayment quartile.

Emerging groups

The total number of households with a mortgage in the District Council of Cleve decreased by 212 between 2016 and 2021. The most significant change in the District Council of Cleve during this period was in the lowest quartile which showed a slight decrease of -33 households.

District Council of Cleve

Housing rental payments

In the District Council of Cleve, 0.0% of renting households were paying \$450 or more per week in rent in 2021.

Rental payments can be a better measure of the cost of housing in the District Council of Cleve than mortgage repayments because they are not contingent on length of occupancy or equity in the dwelling.

High rental payments may indicate desirable areas with mobile populations who prefer to rent, or a housing shortage, or gentrification. Low rental payments may indicate public housing (check **Tenure Type**), or areas where low income households move by necessity for a lower cost of living.

Rental payments are not directly comparable over time because of inflation. For comparison of rental payments over time, go to **Housing Rental Quartiles**.

Analysis of the distribution of households by rental payment quartiles in the District Council of Cleve compared to Regional SA shows that there was a smaller proportion of households in the highest payment quartile, and a larger proportion in the lowest payment quartile.

Emerging groups

The total number of households renting their dwelling in District Council of Cleve decreased by 24 between 2016 and 2021. The most significant change during this period was in the highest quartile which showed a slight decrease of -24 households.

RDA Eyre Peninsula Region

Migration summary

Between 2016 and 2021, Australia-wide, 53.1% of people (aged 5 and over) did not change address over 5 years, while 35.3% moved within Australia, and 5.4% moved from overseas.

In the RDA Eyre Peninsula Region, a higher rate of people did not change address (60.4%), while a lower rate (29.3%) moved from elsewhere in Australia, and a lower rate (1.3%) moved from overseas. A total of 10,289 people, or 62.5% of those who moved within Australia, moved within the RDA Eyre Peninsula Region.

Migration, or residential mobility, together with births and deaths are significant components of population change in Australia. Migration is the most volatile component of population change and can be affected by changing housing and economic opportunities such as housing affordability issues or the mining boom. The three main types of migration are overseas migration, interstate migration and within-state migration, of which within-state is the most common and largely involves moves between neighbouring areas within an urban or regional setting.

Looking at the level and type of migration in the RDA Eyre Peninsula Region can indicate whether the population is sedentary and likely to be in the area for a long time (and perhaps have significant ties to the community), or transient, and likely to move on. Related topics which can be viewed to get a clearer picture of population mobility include **Age Structure** (young adults are likely to move more often) and **Housing Tenure** (generally renters move more often while home ownership indicates a more stable population).

This table shows the broad trends of movement between the RDA Eyre Peninsula Region and the states/territories of Australia, and from overseas over the 5 years from 2016-2021. For more detail on local movements within the state, please refer to the [Migration by age by location](#) page.

Migration between the area and other States/Territories

RDA Eyre Peninsula Region

Migration by age

In 2021, the age group with the highest net migration to the RDA Eyre Peninsula Region was persons aged 25 to 34 years.

The age structure of people who move into and out of the RDA Eyre Peninsula Region is strongly influenced by the residential role and function of the area and can influence demand for particular services. For instance, inner city areas near employment, education and entertainment tend to attract many young people in their late teens and early twenties, who move out in their late twenties and thirties to start families in suburban areas. Rural areas tend to lose young people and gain older families and retirees.

Understanding the RDA Eyre Peninsula Region's attraction to different age groups helps to plan services for the community as well as advocating with other levels of government and private enterprise to provide infrastructure, employment opportunities and facilities which may help to retain age groups which are otherwise leaving the area.

To see annual migration patterns (outside the Census), please refer to the [Annual migration by location page](#). Note - please use this with caution as currently the annual migration numbers are based on pre-Census change-of-address records and may not match the numbers on this page from the 2021 Census

RDA Eyre Peninsula Region

Annual Migration By Location

For the year ending 30 June 2022, the LGA with the highest net migration (+18) to the RDA Eyre Peninsula Region was from Onkaparinga. The highest net loss (-58) was to Port Augusta.

Migration, or residential mobility, together with births and deaths are significant components of population change in Australia. Migration is the most volatile component of population change and can be affected by changing housing and economic opportunities such as housing affordability issues or changes in employment patterns.

This page looks specifically at internal migration, and includes annual data collected since the last Census to look at migration patterns in the most recent time periods. This is helpful to see likely affects on future population growth and where people are moving with the wider region. The data is sourced from the ABS - "Regional Internal Migration Estimates" collection, which is a part of the annual Estimated Resident Population update, and shows movement between all LGAs in Australia. The table shows in and out movements, while the map shows the net total movement between the area of interest and each LGA in the specified time period.

Migration data should be viewed in conjunction with age structure, occupation and household type information to get an appreciation of why people are moving as well as where. Cultural diversity is also an important related topic, as some areas function as first settlement locations of migrants, while others get secondary overseas migration.

RDA Eyre Peninsula Region

Residential building approvals

In the RDA Eyre Peninsula Region there were 12 residential dwellings approved to be built in the financial year 2023-2024 FYTD (July).

The RDA Eyre Peninsula Region's building approvals are used as a leading indicator of the general level of residential development, economic activity, employment and investment. Residential building activity depends on many factors that vary with the state of the economy including interest rates, availability of mortgage funds, government spending, and business investment. Large financial changes or shocks, such as the Global Financial Crisis of 2008/09 can be observed in the data. However, the number of building approvals can fluctuate substantially from year to year simply as a result of the short-term nature of many construction projects, and the cyclical nature of the industry.

Residential building approvals

RDA Eyre Peninsula Region	Number			Annual change		
	Year (ending June 30)	Houses	Other	Total	Houses	Other

RDA Eyre Peninsula Region

JobSeeker and Youth Allowance recipients

In May 2023 there were 4,105 JobSeeker and Youth Allowance recipients in the RDA Eyre Peninsula Region.

This new dataset released by the Department of Social Services is updated monthly. This represents the number of people who are eligible recipients of JobSeeker allowance (generally aged 22+) and youth allowance (excluding students, generally aged 21 and under). To be eligible for JobSeeker, which replaced Newstart allowance in March 2020, participants must be unemployed and looking for work, though certain activity criteria have been relaxed during the COVID-19 period.

JobSeeker rates are a good updated measure of socio-economic disadvantage in an area, and should be looked at in conjunction with 2016 Census SEIFA indexes, employment status, income and education levels. They can also provide an indication of which areas within your region are most affected by the impacts of COVID-19 containment measures.

JobSeeker data are shown for Local Government Areas, and SA2s which have a significant population within the LGA or region.

JobSeeker

Current month	May 2023		March 2020		
Region - LGA/SA2	JobSeeker and youth allowance recipients	% of 15-64 age population	JobSeeker and Youth allowance recipients	% of 15-64 age population	Change

RDA Eyre Peninsula Region

SEIFA by Local Government Area

SEIFA Index of Disadvantage for the RDA Eyre Peninsula Region in 2021 was 938.

The RDA Eyre Peninsula Region Socio-Economic Indexes for Areas (SEIFA) measure the relative level of socio-economic disadvantage and/or advantage based on a range of Census characteristics. Two of the SEIFA indexes: the Index of Relative Socio-Economic Disadvantage (IRSD) and the Index of Relative Socio-Economic Advantage and Disadvantage (IRSAD) can be selected below.

Index of Relative Socio-Economic Disadvantage (IRSD)

This index contains only disadvantage indicators (e.g. unemployment, low incomes or education levels, single parent families, low skilled occupations, poor English proficiency), so is best used to distinguish between disadvantaged areas, but doesn't differentiate between those areas which are highly advantaged, and those just lacking a lot of disadvantage (with population close to the middle). This index is most commonly used for funding allocations and advocacy, because it highlights the areas of most need.

Index of Relative Socio-Economic Advantage and Disadvantage (IRSAD)

This index contains indicators of disadvantage as well as additional indicators of advantage (e.g. professional occupations, high income, higher education levels, high rent, large dwellings), Characteristics are also weighted differently than the IRSD, so areas do score differently on either measure. Often the IRSAD index will show a more "spread out" distribution with a greater range of scores from very high to very low, due to its ability to measure advantage above the average level.

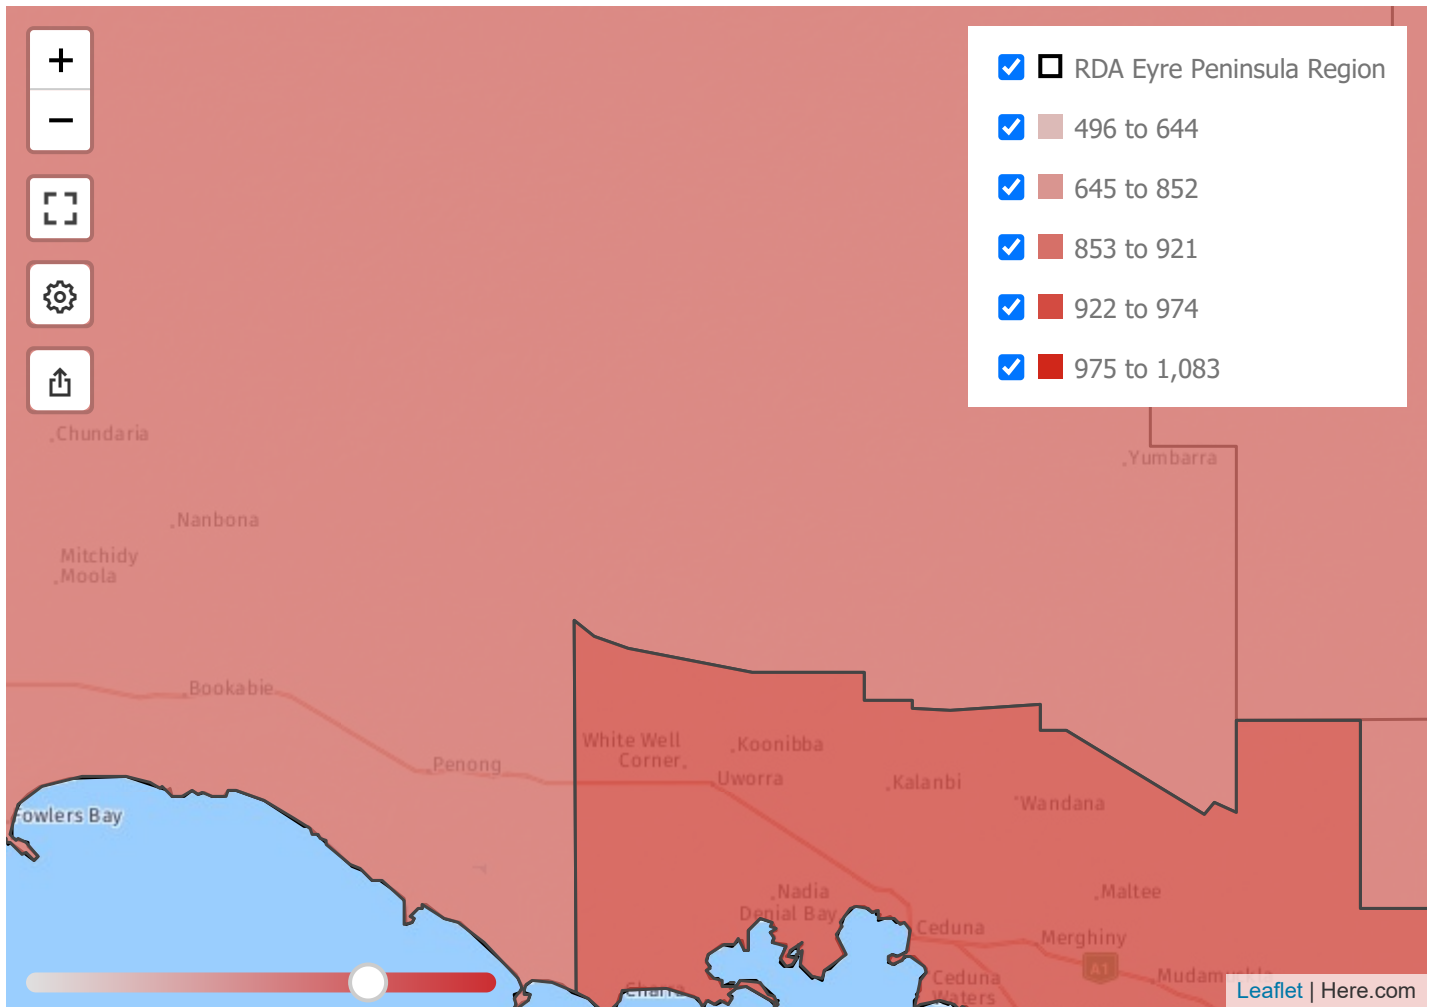

SEIFA indexes are a good place to start to get a general view of the relative level of disadvantage in one area compared to others, but it is important to also look at these underlying characteristics as they can differ markedly between areas with similar SEIFA scores and shed light on the type of disadvantage being experienced.

A higher score on the index means a *lower* level of disadvantage or (in the case of IRSAD only) a *higher* level of advantage. A lower score on the index means a *higher* level of disadvantage on both indexes, and a lack of advantage on the IRSAD.

The percentile column indicates the approximate position of this small area in a ranked list of Australia's suburbs and localities in 2021. It's meant to give a broad indication of where the area sits within the whole nation. A higher number indicates a higher socio-economic status. For instance, a percentile of 72 indicates that approximately 72% of Australia's suburbs have a SEIFA index lower than this area (more disadvantaged), while 28% are higher. This applies a comparison to suburbs even when the index concerned doesn't relate to a suburb.

RDA Eyre Peninsula Region

About the community profile

Demographic change across Australia is recorded by the Australian Bureau of Statistics (ABS) in the Census collections every five years. Population experts **.id (informed decisions)** analyse and convert these raw figures into stories of place to inform council staff, community groups, investors, business, students and the general public.

The RDA Eyre Peninsula Region Community Profile provides demographic analysis for the Region and its suburbs based on results from the 2021, 2016, 2011, 2006 and 2001 Australian Census of Population and Housing. The profile is updated with population estimates when the Australian Bureau of Statistics (ABS) releases new figures such as the annual Estimated Resident Population (ERP).

Suburb boundaries and Census questions change over time, but **.id** manages the data to ensure that there is an accurate time series provided for the current geographic boundaries. You can read more about this in the **Geography Notes** section.

Results for the RDA Eyre Peninsula Region include population, age structure, ethnicity, ancestry, religion, income, qualifications, occupations, employment, unemployment, disability, disadvantage, volunteering, childcare, family structure, household structure, housing tenure, mortgage and rental payments, and the size and type of the dwellings people live in.

The community profile presents this information in clear maps, tables and charts with concise factual commentary to answer three important questions:

1. What are the characteristics of the people who live here?
2. How are they changing?
3. How do they compare to other areas?

This provides the basis for making evidence-based decisions about how to provide services for the community as it changes.

You can be confident about the quality of the information as it is derived from Australian Bureau of Statistics data, analysed and presented by population experts and funded by the RDA Eyre Peninsula Region.
